

Building a Better Future

At this stage we carried out an intense coverage of scholarships, a selection of 40 new students was made.

As is part of the usual work of our Programme, group workshops are held once a month, where we share spaces for collective construction, with objectives and plans made in advance, which revolve around the specific needs of the young people. The dynamics that are applied here are designed so that the scholarship holders can experience a pleasant space in which trust, respect and learning are generated.

As part of one of the strongest axes that we work on in the Programme, we accompany the scholarship holders in their school careers, providing guidance and support so that they can successfully pass their exams. This work is carried out in group spaces, but is strengthened in individual meetings, where each person in charge of support can identify in which aspects and curricular subjects it is necessary to intensify the help.

Continue to join us in our mission.
