

## Education transforms

With the start of the 2025 school year, we began to deploy the first concrete actions that give life to the comprehensive support of the Futuros Egresados programme, which is designed to promote the academic and personal success of young people in vulnerable contexts, guaranteeing an education that opens paths towards the future. With a comprehensive, personalised intervention based on strengthening socio-emotional skills and economic support, our initiative creates concrete opportunities for more than 500 students in 23 schools in the province of Tucumán.

The programme adapts to the specific needs of its students, setting as its academic objective that all students will make it through the school year without failing any subjects. The development of socio-emotional skills will allow young people to build and actively manage their life project, facing academic and personal challenges in a better way.

Education transforms, and your contribution allows us to continue making a difference in the lives of our students by generating a lasting impact, offering opportunities for growth and development.

Thank you for being the engine of change!
