

Rose Breast Health

Breast cancer remains the most commonly diagnosed cancer and the leading cause of death and illness among women worldwide. Despite progress in high-income countries, disparities persist for the underserved population across Australia and Africa, leading to low screening rates, late diagnoses, and poorer outcomes.

"We believe that every woman deserves access to equitable breast healthcare, regardless of their background or circumstances"

What We Do

"Empowering Underserved Women Against Breast Cancer"

At Rose Breast Health, we're dedicated to addressing barriers to early detection and disparities in breast healthcare. Through our commitment to promoting breast health and fundraising efforts, we ensure access to timely and equitable healthcare services for all women, regardless of background, location, or income level.

Get Involved

Donate today to fund essential breast screening, treatment, and support services for women in need. Your contribution makes a difference in improving women's health. Join us in empowering underserved communities for equitable healthcare. Thank you for your support.

ROSE BREAST HEALTH
EMPOWER. IMPROVE. END

Our Mission

Our mission is to improve breast cancer outcomes and reduce mortality and morbidity rates.

Our Initiatives

Breast Health: We educate and empower women through workshops and outreach events, promoting breast health awareness and early detection strategies to reduce late-stage diagnoses and improve outcomes.

Equitable Healthcare Access: We advocate for equitable access to healthcare for all women, collaborating with stakeholders to break down barriers and ensure timely and quality care, regardless of background or income level.

Fundraising Initiatives: Through strategic campaigns and events, we raise funds to support breast cancer screening, treatment, and support programs. Join us in making a tangible impact in the fight against breast cancer.

Our Vision

At Rose Breast Health, we envision a world where every woman receives timely and equitable breast healthcare, regardless of her background or location. We aim to eliminate disparities in breast cancer outcomes and empower women to live healthy lives. Through our commitment to breaking barriers and fostering community engagement, we strive to create a world free from the threat of breast cancer. Join us in our vision for a healthier, more equitable future for all women.
