3. CHUNHUI CARE HOME PROGRAM STORY

Fukang will soon be six years old and suffers from tear duct hypoplasia.

When Zhao Mama first met Fukang, She thought he was a naughty child, but after spending some time with him, She found that he is very gentle, calm and never shouts. He also knows how to be tolerant. He can think quietly when he is alone, and he gets along well with others when he is playing with them. Recently, Zhao Mama accompanied Fukang, to the Xinhua Hospital, where he was to be operated on the next day. He was a little scared to hear about the surgery because he had undergone cleft lip and palate surgery and eye surgery a few years ago. But Zhao Mama was by his side, holding his hand, encouraging and comforting him, and in the end, he was able to actively cooperate with the doctor for the examination and underwent the surgery successfully. Even the doctors and nurses praised him as a strong and brave child.

Right now, Fukang can take the initiative to greet others when he sees them, and everyone praises him for being polite and lovable. Fukang is tenacious, the unfortunate symptoms are like a setback in his long life, and the surgery is just a test. We believe that in the sunny days ahead, Fukang will be able to grow up happily.
