3. CHUNHUI CARE HOME PROGRAM STORY

Deqing born with congenital biliary atresia. In April 2025, shortly after arriving at Beijing Chunhui Care Home, she was admitted to the hospital to prepare for her upcoming surgery.

Deqing's surgery lasted for seven hours included laparoscopic exploration, liver biopsy, and the Kasai procedure. Just after the surgery, Deqing was lying quietly in bed with tubes all over her body. Although Chunhui Mama felt heartbroken, she also saw the dawn of hope.

For the first week after the surgery, Deqing could only be sustained by intravenous nutrition. Whenever she cried from hunger, Chunhui Mama would stay constantly by Deqing's bedside, speaking softly to her and frequently holding her while walking around the room.

In May 2025, Deqing returned to Beijing Chunhui Care Home for postoperative recovery. Right now, Deqing's Chunhui Mama not only prepare nutritious meals for her every day but also play with her and keep her happy all the time. Surrounded by Chunhui Mama's love, Deqing's health is improving day by day. Right Now, Deqing's cheeks are chubby, and her eyes sparkle with lively energy. Every time when Chunhui Mama plays with her, Deqing always responds by puckering her little lips and babbling.

Recently, Deqing has mastered the new skill of rolling over, she keeps rolling over all day long and becoming quite a skillful little roller. Additionally, Deqing has learned to scoot backward while on her tummy. Each time when she moves, she looks back at her Chunhui Mama expectantly, as if proudly demonstrating her new accomplishment.

Under the loving care of her Chunhui Mama, Deqing has become healthy and cheerful. We hope that in the future, Deqing will also grow up healthily and shine with the brilliance of life.

During Deqing's hospitalization, she smiled happily with the company of Chunhui Mama
