

Our volunteers have been packing several bags of knitted blankets to give comfort to vulnerable children and their family who may need to stay overnight and have no bed to sleep in. They will receive teddies too.

Our warehouse team have been sorting through boxes of facemasks to ensure they all of good-quality for our partner health units. They have come in boxes of 50.

Each health unit will receive an outreach bag.

This bag keeps items cold in most extreme hot weather that can be experienced in Sierra Leone.

This Autumn, we are aiming to send a 20ft shipping container of medical supplies to be distributed to 7 health units in Sierra Leone. This will be the first donation that two new partner health units will receive.

This container will consist of vital medical equipment and resources that will **help to provide the best diagnose and treatment to vulnerable children and adults across Sierra Leone.** 100% of the items have been donated to Inter Care by the local community and beyond, however to send these items via container will cost £4,000. Even though the transportation costs have increased, the advantage of sending a container is that large and heavy items (far too expensive to send by air) can be sent economically by Inter Care.

In 2021, we sent our second container to Holy Spirit Hospital in Sierra Leone, which acts as a host for all the surrounding partners health units and distributes the goods amongst them. Person in charge, Dr Patrick Turay, expressed how important Inter Care's donations are for the health units which have a lack of medical resources. He said, "**we have been able to carry out reconstructive surgery due to the quality and effectiveness of the supply of dressings**".

Furthermore, a little boy called Eric, received life-saving oxygen therapy thanks to the O2 concentrator we sent via the container. The staff were so grateful and sent their blessings for our work to continue.

Every donation sent onto a container plays a vital part in improving the health of vulnerable patients across sub-Saharan Africa, those of whom cannot afford to pay for their treatment.

We need your help

We are asking for your support to raise £300 to go towards the transportation costs and help send PPE, mobility aids, medical books, bandages and dressings, barrier cream, stethoscopes, catheters, plus so much more.

"We assure you that these supplies will be used well for the good of the patients. You are a true partner."

Reaction from Dr Turay on arrival of the first container - 2019

We are very grateful for your support and I hope you can consider our request to send the biggest consignment that our partner health units will receive this year.

If you would like any further information, please do not hesitate to contact me via fundraising@intercare.org.uk or 0116 269 5925.

Kind regards,
Claudia Domin
