

We are a **SOCIAL MANAGER** to promote human development

CREATING, ENABLING, MANAGING, AND

EMPOWERING **SOCIAL SOLUTIONS**

We work in the **creation, development, and management of social projects** to articulate different actors in society **for the common good**, advising companies, directing financial, human, material, and technical knowledge resources. With more than **25 years** of history, we connect two groups: those **who can donate** and those **who need to receive**, and thus we continue **multiplying forces**.

WE INTEGRATE:

COMPANIES: engagement donation campaigns, customized social projects, investment programs of tax benefits resources, community relationships, social diagnostics and ESG, evaluation of social results, corporate volunteering, as well as financial and operational management of actions;

PEOPLE: donations management and volunteer service management;

SOCIAL PROJECTS: training program for social entrepreneurs and lectures in general, conversation rounds in communities to rescue the role of the citizen, management consulting for CSOs, social service for beneficiaries of the Integrated Network, renovation/construction of organizations and families in vulnerability, incentive to employability, investment of direct resources for social projects, fundraising for social projects and donation of materials.
