PROJECT TITLE

NUTRITIONAL FOOD FOR 2500 MALNOURISHED CHILDREN

SUMMARY

This project will provide nutritional food to 2500 internally displaced children as a result of terrorist's attacks on 54 villages between May and June, 2023 in Mangu local government of Plateau State Nigeria. The children, ages 5-10 years, are facing starvation and acute malnutrition due to poor feeding in the IDP camps, making their body vulnerable to illness and the long term effect can be devastating.

A meal per day for these children will not only save and sustain their body system, but will translate to better nutrition, healthier children and invariably better future.

CHALLENGES

There are lots of children in the IDP camps without any source of livelihood therefore, this provision will help provide food and improve nutrition of children. They are in dire needs of nutritional foods to sustain their health while waiting for a permanent solution.

SOLUTION

This project will provide nutritional meals to 2500 malnourished children in the IDP Camps to boost their health.

LONG-TERM IMPACT

The nutritional food will build a good immune and body system in the children for healthy growth and development. It will also inculcate the virtues of love, support for one another and build the spirit of unity among the children growing up. It will erase in them, the negative memory that could have occurred as a result of hunger, starvation and possibly dead if such support were not provided.

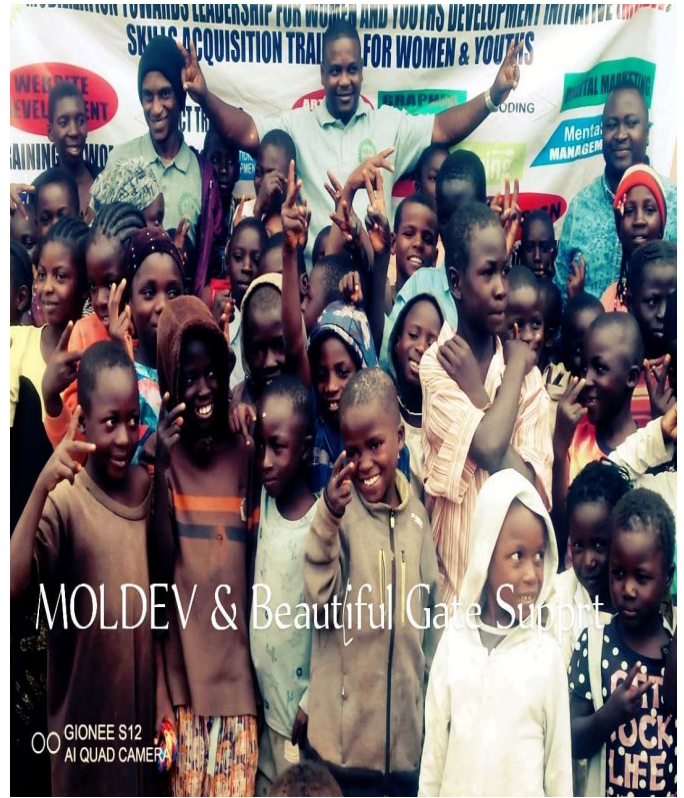

PROJECT BUDGET:

SN	ITEM	NO. OF PERSONS	Unit Cost NGN	No. of Days	No. of Months	Cost NGN	Cost USD
