A PATH TO HOPE & HOUSING

OUR PROGRAMS

→ Market Street Shelter

This emergency congregate shelter site hosts up to 120 individuals experiencing homelessness and offers 24/7 staffing and support. Market Street Shelter provides the gateway to our services.

→ Transitional Villages

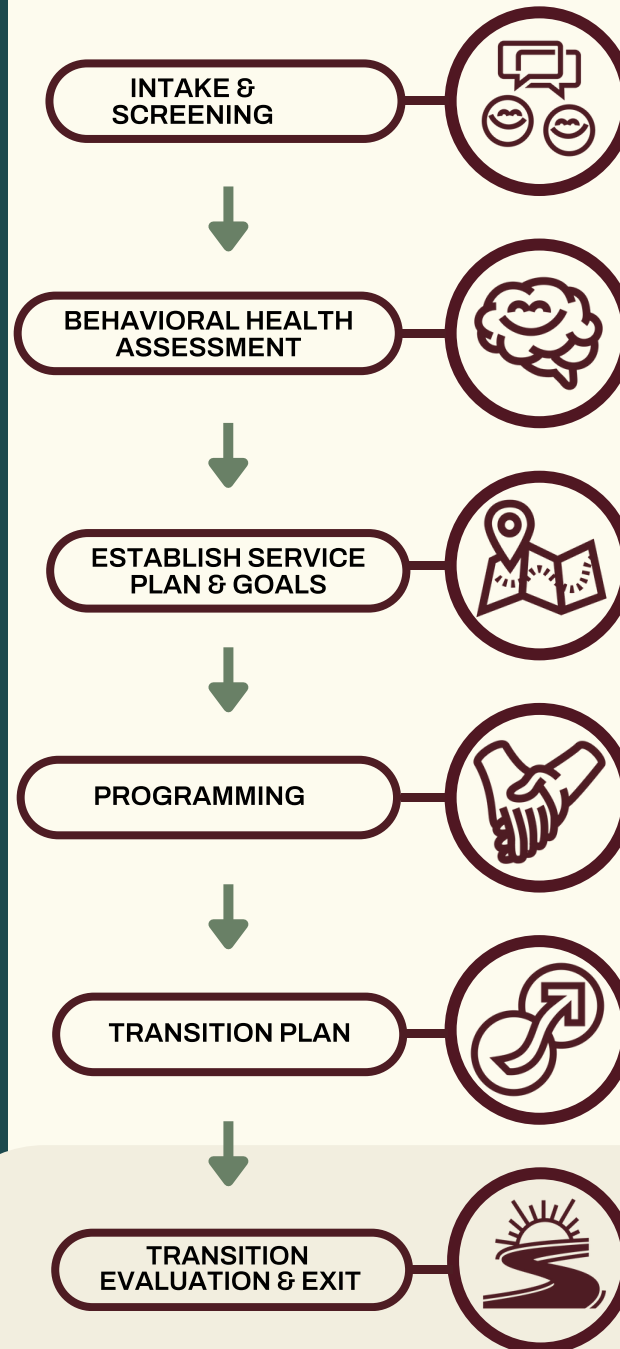

Transitional villages provide safety from the street and a way to build community while accessing services, with many individuals working toward permanent housing. Each transitional housing unit provides a participant with their own secure, locked space including a bed, electricity and temperature control.

- BIPOC Village
- Queer Affinity Village
- Multnomah Safe Rest Village

→ Rockwood Bridge Shelter

This 44-room bridge shelter hosts participants who have already been approved for permanent supportive housing, “bridging the gap” in the transition from shelter to housing. Participants receive ongoing behavioral health support, community and additional resources to ensure success in retaining their housing.

A PATH TO HOPE & HOUSING

→ Intake

Once an individual experiencing homelessness has entered one of our shelters, a Behavioral Health Lead will meet with them to determine their baseline, strengths, interests, and other factors that may determine their path forward.

This information is used to assign the participant a Case Manager who will work with them throughout their time in shelter.

→ Programming

Once settled, participants then meet with their Case Manager to establish their goals for their time in shelter.

Our Wraparound Team works together to engage the participant, connect them to services, and help them toward their goals!

→ Transition

“Transition” happens when a participant has completed programming and is moving into their next placement beyond our shelters.

If this transition is toward permanent housing, a Mobile Retention Specialist will be assigned to work with this individual to ensure a smooth transition into housing and provide support throughout!
