

TECH 

FOOD SECURITY

Description:

The project consists of supplying the common pots with non-perishable food that will allow them to guarantee food rations for their beneficiaries.

Objetives

- 1 Continue to serve families in vulnerable situations in the face of food insecurity and price increases.
- 2 Decrease the rates of malnutrition and anemia in the population.

WATER SOLUTIONS

Description:

Ensure that a common cooking pot can be provided with clean and safe water storage. These can also be installed with handwash structure.

Objectives

- 1 The project consists of the installation of a water tower plus a 1,100lts water tank and water filter.
- 2 Decrease the risks of disease contagion, due to lack of clean and safe water.

Beneficiary population

The solutions can be familiar or community based

MULTIPURPOSE COMMUNITY CENTER

Description:

Wooden community building with a calamine roof built on a cement slab, which can be painted or varnished as required by the community.

Objectives

- 1 Create a space that allows the development of the community, which can be used for meetings, workshops, library, among others.
- 2 Promote community cohesion through each of the activities carried out in it.
