About the project:

Strengthening Support: Disaster Management and Humanitarian Response " The Fund" project, implemented by the (SORD,) is an effective strategy for providing robust and rapid support in disaster management and humanitarian response in affected areas of Yemen. The project aims to enable the organization to adapt to multiple challenges and contribute immediately to supporting various groups with flexibility and efficiency.

The project aims to provide rapid interventions and urgent humanitarian assistance to families displaced by conflict or natural disasters in Yemen, focusing on resilience, accessibility, and positive adaptation. It will provide food supplies, shelter, and psychosocial support, in addition to interventions tailored to the specific needs of fundraising system to support disaster affected families. The project also establishes a management and humanitarian response during conflicts and emergencies in Yemen. Furthermore, it aims to bolster the organization's existing stockpiles for emergency interventions in conflict and natural disaster zones in Yemen, both before and during such events, to provide urgent, life-saving assistance to displaced families in areas affected by natural disasters and armed conflict.

Building Resilience Project: Yemen Disaster Management and Humanitarian Response (SORD). The United Nations Office for the Coordination of Humanitarian Affairs) Fund (OCHA) has published the Yemen Humanitarian Response Plan, which aims to provide assistance and protection services to the most vulnerable and needy. million people in Yemen will require some form of According to the plan, 21.1 representing two-thirds, humanitarian assistance and protection services during 2024 million of the of the population. The UN is appealing for US\$4.3 billion to reach 17.3 most vulnerable and needy people. The response approach will be organized around three strategic objectives: strengthening life-saving activities, building resilience and contributing to sustainable solutions, and providing protection. The plan recognizes the importance of working closely with development partners to prevent a wider collapse of basic services. The humanitarian, development, and peacebuilding sectors will engage in coordinated work under the strategic umbrella of the recently established Yemen Partners Group and its operational structure, the Yemen Partners proposal aligns with the objectives of the Humanitarian Technical Team. Your project Response Plan and can contribute to strengthening families' resilience.

General objective:

The overall objective of the Fund's support system project for disaster management and humanitarian response in Yemen is as follows:

The project aims to provide emergency relief in exceptional circumstances such as wars and disasters, alleviating suffering caused by conflicts, natural disasters, and economic collapse in Yemen. This will be achieved through the provision of rapid, effective, and targeted humanitarian assistance to displaced families. This includes providing food, water, shelter, healthcare, psychosocial support, and assistance in rebuilding livelihoods and strengthening resilience.

1. Providing rapid and effective humanitarian assistance to families affected by disasters and wars in Yemen, including food, water, shelter, medical care and psychosocial support.
2. Reducing food insecurity and malnutrition: The project will provide food baskets, water purification tablets and other essential supplies to affected households to help them meet their immediate needs and prevent malnutrition.
3. Improving access to shelter and sanitation: The project will distribute emergency shelter kits and construct temporary housing units for families who have lost their homes. Sanitation facilities in affected areas will also be improved to prevent the spread of disease.
4. Improving access to healthcare: The project will establish and support mobile clinics and healthcare facilities in affected areas. Medical care, including psychological counseling and support, will be provided to those in need.
5. Increasing educational opportunities for children affected by the crisis: The project will implement educational programs and provide learning materials to help children continue their education. It will also address the psychological and social impacts of the crisis through psychosocial support programs.
6. Enhancing economic empowerment among affected families: The project will provide livelihood opportunities, vocational training and microfinance loans to help families become self-sufficient and rebuild their lives.
7. Strengthening social cohesion among affected communities: The project will support civil society organizations, promote social interaction, and foster a sense of shared responsibility and support to strengthen social cohesion among affected communities.
8. Building resilience among affected communities: The project will train community members on disaster preparedness and response measures to build resilience and reduce exposure to future disasters.
9. tangible and lasting impact by achieving these goals, the project aims to make a on the lives of Yemenis affected by disasters and war. It will help alleviate suffering, enhance resilience, and contribute to achieving peace and stability in Yemen.

Achievements:

As a result of the recent missile attacks on Yemen due to the ongoing war, as well as the floods and torrential rains that swept through the country during August and September, these events have resulted in significant human and material losses in many areas of Yemen. Many people have died, numerous homes have been completely or partially destroyed, and hundreds of families have been displaced from various regions. Reports and field surveys indicate that thousands of families were affected, both materially and in terms of human lives, between June and September and that the risk of gender-based violence and violations has increased, 2021 particularly among women and children. Yemen is experiencing a major crisis and disaster that the relevant authorities are failing to address. Therefore, one of the project's objectives is to provide an urgent and emergency response to deliver humanitarian aid and emergency relief. (SORD) implemented its activities in accordance with the ongoing events in the targeted areas, and thanks to.

its presence in these areas, it was able to quickly provide relief and assistance to families affected by the disasters (floods and war), including food and shelter, as follows:

Food aid was provided to 25 war-affected families who were forced to leave their destroyed and uninhabitable homes. The aid included:

Twenty-six displaced families benefited from the provision of emergency food and shelter kits, including food items, mattresses, blankets, and kitchen utensils. These kits benefited 182 individuals, including 45 men, 84 women, and 53 children.

Assistance was provided to 18 elderly people with diabetes and high blood pressure through diabetes and high blood pressure treatments.

Twenty-two pregnant and breastfeeding women underwent medical examinations and received the necessary treatments and nutritional supplements under the supervision of doctors and nutritionists.

Eleven children, aged between nine and fifteen, were referred to psychologists and social workers for psychological support after suffering psychological trauma as a near their homes result of air raids.

Therefore, the number of beneficiaries of urgent and emergency aid is as follows:

182 individuals benefited from food and shelter assistance.

- elderly people with chronic diseases benefited from the treatments 18 and medications.
- pregnant and breastfeeding women benefited from medical 22 examinations and nutritional supplements.
- Eleven children benefited from psychological support.

Difficulties and obstacles:

lack of resources and funding, the organization contracted with merchants Due to a to provide relief supplies in installments until funds became available.

Increasing the number of people eligible for assistance.

Multiple sources of disasters, multiple areas where they occur, and the continuation of war.
