

FORGOTTEN NO MORE

Opening Doors to Education

Help for the Children & Youths of Teahplay, Liberia, West Africa

Project Budget

- Toilets and septic tank

Cost—\$3,500

- Well and Water Tower

Cost—\$5,500

- Transportation

Cost—\$500

Sanitary Care Needed

The students and teachers of Teahplay School need your financial help to build modern toilets, a septic tank, well, and water tower.

Why? They currently have to poop and pee in pit toilets or bushes. The condition is miserable, unsanitary and unsafe especially for the younger students, several have almost fallen into the pit toilets (holes in the ground).

Also there is no well on the school premises so parents carry buckets of water to the school for drinking and washing of hands. Building new toilets, a septic tank, well, and water tower will reduce incidents of diarrhea and typhoid fever among the 300 students and teachers, caused by contaminated water, lack of water and poor sanitation at the school. This will improve their general health and well-being, increase school attendance, and graduation rates.
