Report on the STEM workshop held at Elementary School Sela

I would like to start by saying thank you to the Bioteka team for conducting such needed an interesting program thru STEM mobile laboratory.

Our students from 2nd to 6th grade actively participated the workshops with focus and interest, enthusiastic about the lecturer's approach to various topics from the field of science and technology i.e. STEM.

We are especially thankful to Bioteka for giving the students of Elementary School Sela this wonderful opportunity to be part of your STEM program. It has played a significant role in encouraging our children to explore the STEM field. This means a lot to us, particularly because our students do not frequently have access to such enriching activities.

We hope many other students in remote areas will also get to experience this fantastic and unique STEM program!

School principal

Draženka Kušević

A handwritten signature in blue ink, appearing to read 'Draženka Kušević', written over the printed name.
