

Global Outreach Centers

I-DIEM
Institute for Diversity and Inclusion
in Emergency Management

I-DIEM Africa

- The Institute for Diversity and Inclusion in Emergency Management (I-DIEM) is proud to announce the establishment of a Global Outreach Center in Ghana, West Africa. Climate change has wide-ranging and significant impacts on the African continent. As a region highly vulnerable to climate-related challenges, Africa faces various consequences, affecting its environment, societies, economies, and overall development. I-DIEM will continue its community centered mission to empower and promote Community Crafted Resilience Solutions (CCRS) within Africa.

Community Crafted Resilience Solutions

I-DIEM supports climate equity, also known as climate justice, which refers to the **fair and just distribution** of the costs and benefits of addressing climate change and its impacts.

It recognizes that the **historical and current contributions** to greenhouse gas emissions and vulnerability to climate impacts are **unevenly distributed** across countries, regions, communities, and social groups.

Climate Change in Africa

Certain populations and countries are **more vulnerable** to the effects of climate change due to factors such as poverty, lack of resources, geographical location, and historical responsibility for greenhouse gas emissions.

At the same time, these vulnerable populations and countries have **contributed relatively less** to the greenhouse gas emissions causing climate change compared to more developed and industrialized nations, like the United States of America.

Climate Resilience

- Several countries in Africa are working on various **adaptation and mitigation strategies**, including renewable energy, implementing sustainable land and water management practices, investing in climate-resilient infrastructure, and participating in international climate agreements.

I-DIEM AFRICA

- As a global organization focused on climate equity and building community resilience, I-DIEM has pledged to increase our support of African nations by establishing I-DIEM Africa to collaboratively tackle the challenges posed by climate change and **ensure a sustainable future** for the continent.

Establishing the Global Outreach Center in Ghana, West Africa

- Community Impact
- Government benefit
- Climate resilience
- Inclusive Climate Resilience

Funding Strategy

- Government Contracts
- Direct Community Investments
- Grants
- International Donors
