

Community of Children's Rights - CCR

**Empowering differently-abled and
underprivileged children from ultra-poor
families for a brighter future.**

ORGANIZATIONAL OBJECTIVES

The Community of Children's Rights (CCR) is committed to safeguarding children's rights, with a special emphasis on access to basic education. Our efforts center on enrolling and retaining out-of-school children aged 5 to 16 in primary education, creating opportunities for their progression to higher education. By recognizing education as a fundamental right, we strive to empower children, fostering their growth and securing their future.

PROJECT AND SUPPORT SERVICES

- CCR provides free education to children enrolled in its programs, ensuring accessibility for all.
- In addition to education, CCR offers essential supplies such as stationery and uniforms at no cost to its students.
- The organization also supports children from economically disadvantaged backgrounds by providing ration packs and nutritious lunches. This initiative seeks to reduce the financial strain on families and inspire children to actively participate and thrive in their education.

FUTURE ENDEAVOURS

Our mission extends beyond addressing the immediate needs of children from underserved and ultra-poor backgrounds. We aim to establish sustainable programs and partnerships that empower children and their communities. By fostering a sense of inclusivity and resilience, our future endeavours focus on:

- Expanding access to quality education through the development of schools and learning centres.
- Launching vocational training programs to equip children with essential life skills.
- Providing healthcare initiatives to ensure a healthy start for every child.
- Advocating for children's rights on national and international platforms to create systemic change.

VISION: "EQUAL OPPORTUNITIES FOR EVERY CHILD TO LEARN, GROW, AND THRIVE."

We aim to build an inclusive education system for children with disabilities and those from poor backgrounds by:

- Creating accessible schools with trained teachers and tailored curricula.
- Offering free resources, scholarships, and stipends to support learning.
- Providing vocational training and life skills for future independence.
- Ensuring regular health check-ups and psychological support.
