

IAHV Climate Action Now - FLY GREENER Campaign

Activity + Impact report

by IAHV Project Team, published on **Aug 17th, 2025**

Thank you!

A big "Thank You" to all our donors. Thanks to your generosity, over the last few months; the Globalgiving page of Earth Day 2025 - Fly Greener has raised a **total £1899.44** (as on August 14th, 2025) that'd plant thousands of new trees removing scores of tonnes of CO2 for every year the trees grow. We'll publish more precise impact numbers in the end of year report.

You know the value of planting trees: to help stop climate change, to restore nature, to provide paid work to help people out of extreme poverty. Planting more trees is both low cost and helps make a huge difference to the socio-economics of the local communities.

Earth Day 2025

The newly launched [IAHV London Centre](#), in partnership with [One Der Shoreditch Exchange](#) in Hoxton, the event EARTH DAY was hosted. Donors, partners from Rotary London District and Loving Social Media and from the academia came together. Charles A., IAHV Board member, launched the 2025 campaign FLY GREENER. Shailen M., IAHV Board member, talked about the amazing value unlocked with partnerships; when businesses combine each unit of their sales with a certain number of trees planted with [IAHV](#) and [NOC02](#). A gift was also pledged to IAHV on this day.

The very last page of this report shows the one-pager graphic collateral created for this International Earth day event and shows QR code to many action points & ways to get involved.

Credit to our partners

Grateful for the collaboration amongst NOC02, ROTARY International, Saving Our Planet, IAHV and ART OF LIVING together. Our next goal is to fundraise for 2 million trees 🌱 🌿 🌳

Updates from the Reforestation site

A representative of the sponsor was visiting their nursery in Madagascar

Raising awareness among young people in schools (how to plant efficiently and protect nature).

Training session for project beneficiaries and distribution of farmers' kits

Reopening of the nursery after distribution of the previous season's plants. We use the labour of the beneficiary communities to put the plants in pots. This provides them with a source of income and involves them in the sustainability of the project.

For the RPPR programme we provide educational sessions to the locals to ensure they understand how to manage their plantation and what are their responsibilities

IAHV UK youth leaders delegation to the United Nations Forum for Climate Change - COP30 in Brazil, Conference scheduled in Nov 2025

Current Intern Muskaan and Core Volunteer Sienna are both nominated to represent the organisations IAHV UK and [Saving Our Planet](#) (France and USA) in the forthcoming United Nations Annual Conference of Parties for Climate Change. The COP30 is scheduled in November in Brazil, 500km from where one of the partner reforestation sites is. Amongst the plan is to network for collaborations at the highest level, including with WHO at the Health Pavillion.

Watch this space for more.

What next?

Join the movement to not just love nature, not just take from it; but also care for and protect Nature. For questions or to discuss a strategic partnership, email:
