# Why with **Parceiros Voluntários**?

We are an **NGO created 27 years ago in Rio Grande do Sul (RS)**, with presence throughout Brazil, which develops social technologies that allow us to co-create and implement **solutions that positively impact the entire social ecosystem.**

Our actions have benefited **more than 9 million people.** We are operationally anchored in a solid governance model to **provide full transparency.**

# Our role in **facing the challenges in RS**

Our role at this point is to act as a **reliable integration agent** between donors (from Brazil and abroad), volunteers, NGOs and government authorities.

To this end, we **articulate different social actors to best allocate resources** to the people and communities that were most affected by the rains in Rio Grande do Sul.

## Our role in this action

In addition to **fundraising and efficient allocation**, our role is also to **guide**, especially as it relates to volunteer work, to an **awareness of best practices** for individuals and companies.

The collective impulse at this moment is that many people want to act at the same time, but we are conscious that the routine of cities and families will take months to be reestablished. Therefore, our work will continue **until the resources are fully and correctly allocated**, thus mitigating the effects of floods in RS, within our possibilities of action.

# Secure allocation of resources

## What ensures that resources will be put to good use?

We have a rigorous auditing process that verifies the correct allocation of resources and their accountability.

- PwC's External Audit
- Structured governance of PV ensured by Audit, Compliance and Risk Management Committees

## How are we defining the allocation of resources?

- Alignment with the Civil Defense of the State of Rio Grande do Sul
- 18 PV units in the state of Rio Grande do Sul constantly mapping need, and planning accordingly
- Network of Civil Society Organizations that are partners and partners with PV

**We proudly  
work under the  
umbrella of  
some of the  
most  
transformative  
initiatives in the  
world**

# How to Participate

Cash Donations

Donations of materials

Volunteering

Responsible Action

## Donations of materials

We are prioritizing direct allocation to the Civil Defense, other collection points and shelters.

## Volunteering

We indicate the **registration of volunteers in the Civil Defense of RS** that is articulating the actions. It is important to keep in mind that there is already a large contingent of volunteers working, so the call may take some time. In addition, it will be necessary to have volunteers in different phases of caring and reconstruction and there will be an appropriate time when everyone can help.

## Responsible Action

You can also contribute by spreading credible information. We advise you be extra conscious and responsible with what you share.

# What have we already done?

Between September and November 2023, the Taquari Valley region faced the two largest floods in its history thus far.

At that time, we **also carried out a campaign** that mobilized companies and people.

The allocation of resources was carried out in a coordinated action with the PV unit in Lajeado, in the Taquari Valley, and with the local Civil Defense.

At that moment we raised **R\$ 656,500.00** that were allocated to:

- Purchases of cleaning and hygiene kits
- Purchase of stoves and gas kits
- Purchase of mattresses and furniture
- Purchase of medicines
- Purchase of high-pressure washers

All purchases were donated to families affected by the flood in the cities of Encantado and Roca Sales. You can track the process and get the report all the actions taken in our website:  
<https://parceirosvoluntarios.org.br/valedotaquari/>
