

# Project Progress Report

## Rehabilitation of Children with Disabilities

**Supported by:** GlobalGiving Platform

**Organization:** Arushi Society

**Reporting Period:**

October 2025 to *January 2026*

## 1. Introduction

This progress report outlines the continued implementation and outcomes of the rehabilitation project for children with disabilities, supported through generous donations received via the Global Giving platform. Over the subsequent three-month period, Arushi Society continued to provide structured therapeutic interventions to children with diverse developmental needs, building upon the gains achieved during the previous phase of the project.

## 2. Objective

The objective of this phase was to ensure **continuity of care** through regular physiotherapy, occupational therapy, and speech & language therapy. The focus remained on further strengthening motor skills, communication abilities, independence in daily activities, and emotional well-being, while also reinforcing parental involvement.

## 3. Beneficiaries

During this reporting period, the project continued to support **15 children with special needs**, including children with:

- Autism Spectrum Disorder
- Intellectual Disabilities
- Speech and Language Delays

All beneficiaries received individualized therapy plans based on periodic assessments and progress reviews.

## 4. Activities Implemented

### S. No. Activity Type

- 1 Physiotherapy
- 2 Occupational Therapy
- 3 Speech & Language Therapy
- 4 Parental Counseling
- 5 Progress Assessments

Therapy sessions were delivered by trained professionals in a safe, inclusive, and child-friendly environment. Therapy goals were reviewed and adjusted based on each child's progress

## 5. Outcomes and Impact

- **Improved Motor Coordination:**  
9 children showed further improvement in balance, coordination, and fine motor skills.
- **Enhanced Communication Skills:**  
6 children demonstrated progress in expressive and receptive language, with increased use of words, sounds, or meaningful gestures.
- **Increased Independence:**  
7 children showed greater independence in daily living activities such as feeding, dressing, and maintaining personal hygiene.
- **Improved Attention and Social Interaction:**  
Several children showed improved attention span, eye contact, and participation in guided activities.
- **Empowered Parents:**  
Parents reported increased confidence in supporting therapy goals at home through regular counseling and guidance.

## 6. Voices from Families

*“We can clearly see improvement in our child’s movements and understanding. The regular therapy has made a big difference.”*

— Parent of a beneficiary

*“The guidance we receive as parents has helped us continue therapy activities at home. We feel more hopeful now.”*

— Parent of a child with speech delay

## 7. Conclusion

The continued support from Global Giving donors has enabled Arushi Society to sustain quality rehabilitation services over this three-month period. The consistent therapeutic interventions have resulted in measurable developmental progress and strengthened family engagement. This phase has reinforced the importance of sustained, long-term therapy for children with disabilities.

## 8. Way Forward

- Continue individualized therapy plans with enhanced goal-setting
- Introduce **small group therapy sessions** to promote peer interaction
- Develop **home-based activity modules** for parents
- Expand outreach to include more children in future phases

## Acknowledgement

We sincerely thank **Global Giving and all contributing donors** for their continued trust and support. Your contributions are transforming lives and creating pathways toward independence and inclusion for children with disabilities.
