

A widow able to fend for OVCs

The support provided to our formerly impoverished widows is continuously yielding positive results.

A widow who preferred to be supported with vegetable seedlings in addition to on garden mentoring, can now pay school fees for his 14 year old orphan.

She is also able to buy milk for her 7 months old grand child-born from an HIV/AIDS positive 32 years old daughter.

The supported widow in photo, the son and the daughter mother to the baby not in photo were all praises for the support got from SORAK and global giving. She has to day established a road side vegetable selling stall where she earns \$ 5 per day. This she could not dream of before global giving support.

Cabbage harvests and a happy widow with OVCs at their road side vegetable selling stall.

Another \$ 100 can make 5 more widow headed household live a promising and healthier lives.
