

TO THE FUTURE

“DISABILITY VIA ART”

~ Mikotaj

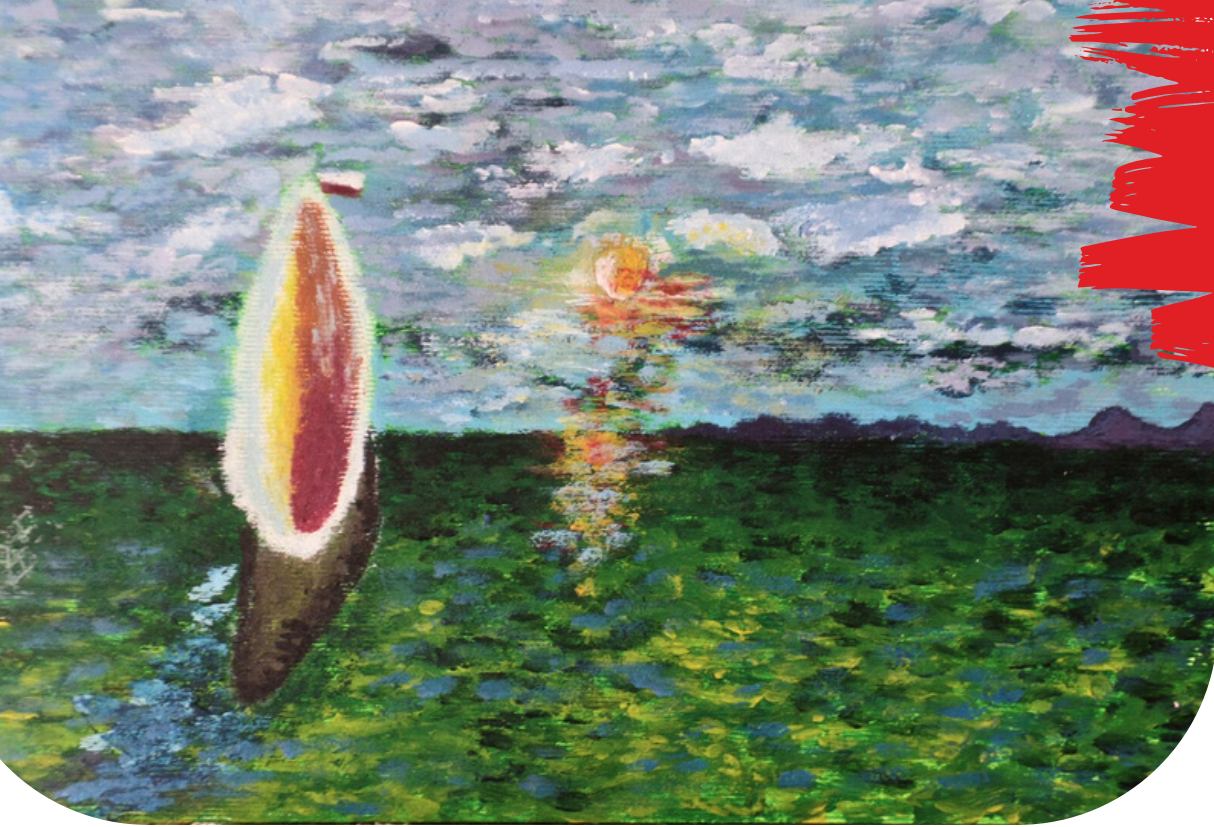

ABOUT FOUNDATION

The To The Future Foundation was founded in 2022 in Wrocław, Poland. It focuses on equalizing opportunities and fostering social integration for individuals at risk of exclusion. We conduct educational, cultural, and social projects in the Wrocław area. Our goal is to support various social groups, promote positive relationships, and activate children and youth.

Our aim is to create a dedicated space where people with disabilities and seniors can actively participate in artistic workshops, breaking down societal barriers and promoting mutual growth through the transformative power of art.

DISABILITY VIA ART

WHAT IS THE CHALLENGE...

People with disabilities and seniors often face isolation, and their access to artistic expression and communal engagement is limited. This project seeks to address these challenges by providing an inclusive environment that encourages creative expression and social interaction. Overcoming preconceived notions about the abilities of individuals with disabilities is a key challenge, and the project aims to change perceptions through meaningful engagement.

ELDERLY PEOPLE

Elderly people are our focus since this year. We've organised needed support groups, activities, and excursions for them to alleviate loneliness, poverty and social exclusion.

After that, we realized how important it is. Because nobody what to be alone. Especially during their oldness.

By incorporating seniors into the art-centric initiative alongside individuals with disabilities, the project strives to boost seniors' sense of empowerment and involvement. Through artistic expression, seniors can discover a revitalized sense of purpose and connection, enriching their lives with meaningful experiences.

Oldness via ART

OUR SOLUTION

To address the challenge at hand, we create a dedicated space that accommodates the unique needs of people with disabilities and seniors. This space serves as a hub for artistic workshops, fostering creativity, self-expression, and social interaction.

This initiative, known as the "To The Future Disability via Art" project, is designed to address the issues of isolation and inactivity that often accompany these conditions.

The core of the project involves conducting workshops tailored to the needs and interests of individuals with disabilities and the elderly. The aim is to create an inclusive environment that encourages active participation and combats the tendency for these individuals to stay at home, feeling excluded from broader social activities.

THERE ARE NO AGE BARRIERS

SOCIAL CAMPAIGN

Moreover, the project includes the launch of a social awareness campaign featuring Mikołaj "Disability via ART", putting a spotlight on the artistic capabilities of individuals with disabilities. Through this campaign, the Foundation aims to challenge stereotypes and inspire a more inclusive mindset within society.

It all began from Mikołaj - disabled boy, whose disability prevents him from interacting with people and participating in activities.

In Mikołaj's world, where physical limitations may restrict traditional forms of communication and socialization, art becomes a powerful medium for self-expression.

- Mikołaj

The project named “TO THE FUTURE - Disability via ART” is the effect of our own experience, observation and conversations with parents, guardians and elderly people.
