

Education is not a
PROBLEM,
Education is an
OPPORTUNITY

About the project

In remote communities of Armenia, people live in extreme poverty. It is difficult for parents to build a prosperous life for their children, as many of them can barely make a living. The goal of our team is to improve the quality of life for children in these families, and most importantly, educate them.

Our pre-selected pedagogical staff regularly organizes non-formal meetings in these remote regions and in Yerevan, providing beneficiaries with necessary school-based knowledge and "life skills".

The children of our communities show great interest in getting involved in the open classes where they can compose a view of the beautiful scene and, of course, participate in the main educational activities. Due to your support, they played an activating game and each of them had the opportunity to share their own small ideas that they would try to implement after getting motivated with education. They shared their stories with great enthusiasm. By having stationery and art supplies, the beneficiaries were able to portray the ways that will help them to reach their aims.

Your donations were directed to the implementation of a very important process: the provision of children's basic education in our target group. Each step inspires them to be courageous, competent and responsible. We are grateful to you for your support. And your donations were directed to the children's bright future and an educated society in Armenia.

PROVIDING EDUCATION FOR 150 CHILDREN IN ARMENIA

Beneficiaries success stories

The following is Vahagn's story and a message addressed to the donors:

"Hello, my name is Vahagn. I joined this program with great enthusiasm. Everything that happens during these seminars is interesting to me. I really enjoy interacting with my peers in this environment. We performed activities where we had to show our persistence, courage, friendliness, etc. I hope that this program will continue and we will have the opportunity to meet again."

The following is Alina's story and a message addressed to our donors:

"Hello, I am Alina. It is so interesting for me to participate in this program, because I gain new knowledge. In addition to gaining social-emotional skills, I also get to know my peers and make new friends. During the seminar, we perform both individual work and team work. We have the opportunity to learn about such ideas as self-expression, and peaceful conflict resolution."
