

**Fundación Huésped's
Impact Through
Global Giving**

Summary

Over the past few months, **Fundación Huésped** has continued to provide **vital, no-cost services** throughout Argentina, including HIV and syphilis testing, counseling on sexual health, legal support, and mental health care. These efforts have reached **thousands of individuals**, particularly in vulnerable and underserved communities.

Our Impact

- **13.465** cases attended in our personalized care centers.
- **1.459** individuals received legal support.
- **295** people accessed free psychological support, both individually and in group sessions.
- **1.300** individuals were trained through our courses on comprehensive sexual education.

Recent Key Activities

During the summer vacation period we organized a community-based testing event at one of the country's most popular train stations: **Mar del Plata**. This strategic timing allowed us to reach a large number of people in transit who might not otherwise have access to testing in their home communities. **Our team provided free rapid HIV testing, counseling, and educational activities focused on HIV prevention and sexual health.** These initiatives are essential to promote early diagnosis and reduce barriers to healthcare access for mobile and often underserved populations.

Recent Key Activities

In parallel, our Executive Director, Leandro Cahn, participated in a public conversation on comprehensive sexuality education during a live talk at the **Ticmas stand at the Buenos Aires Book Fair**. In dialogue with journalist Patricio Zunini, he reflected on the importance of addressing topics such as masculinities, sexual education, and the role of adults in supporting adolescents—emphasizing that ESI (Comprehensive Sexuality Education) not only informs, but also helps build citizenship and inclusion.

Recent Key Activities

Additionally, Fundación Huésped launched a new partnership with the **Córdoba Legislature** to strengthen HIV and STI prevention. This joint initiative offers free virtual training courses for healthcare professionals, educators, activists, and community organizations, aiming to enhance public knowledge and build local capacity across the country.

Your continued support
through GlobalGiving
makes our work possible.

In a context where
sustaining and expanding
our services is more
important than ever, **we
thank you for helping us
bring healthcare closer to
those who need it most.**

Thank you!
