

# WHEELS OF LIFE

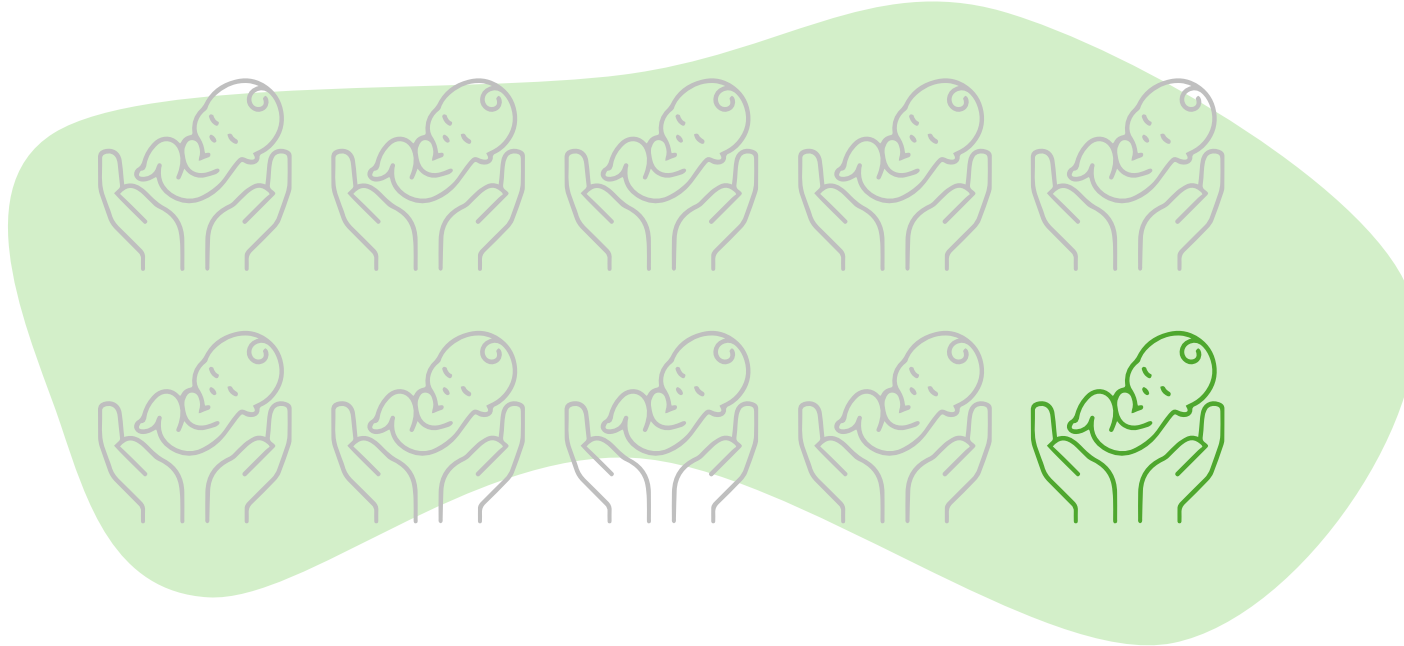

NEONATAL AMBULANCE

**BLAGOMAY**

charity for the future

Due to active hostilities and missile threats, the number of prematurely born children in Ukraine is increasing because of constant stress.

In critical cases, there is a need for the transportation of newborns.

According to the Ministry of Justice of Ukraine, **187,300** children were born in **2023**. Nearly **18,730** of them were born prematurely.

Every **10th** child in Ukraine is born prematurely.

## NEONATAL AMBULANCES

A neonatal ambulance is a "**resuscitation on wheels**", equipped with advanced medical equipment and a transport incubator.

It is the only means for urgent and safe transportation of newborns with complications or critical weight to highly specialized medical centers.

As part of the **"New Hospitals"** project, two neonatal ambulances were delivered to **two** hospitals in the Mykolaiv region in 2024. These ambulances have already made **201 trips** and saved **79 children's lives**.

And this is just in **6 months** of using the ambulances.

## PROJECT GOAL:

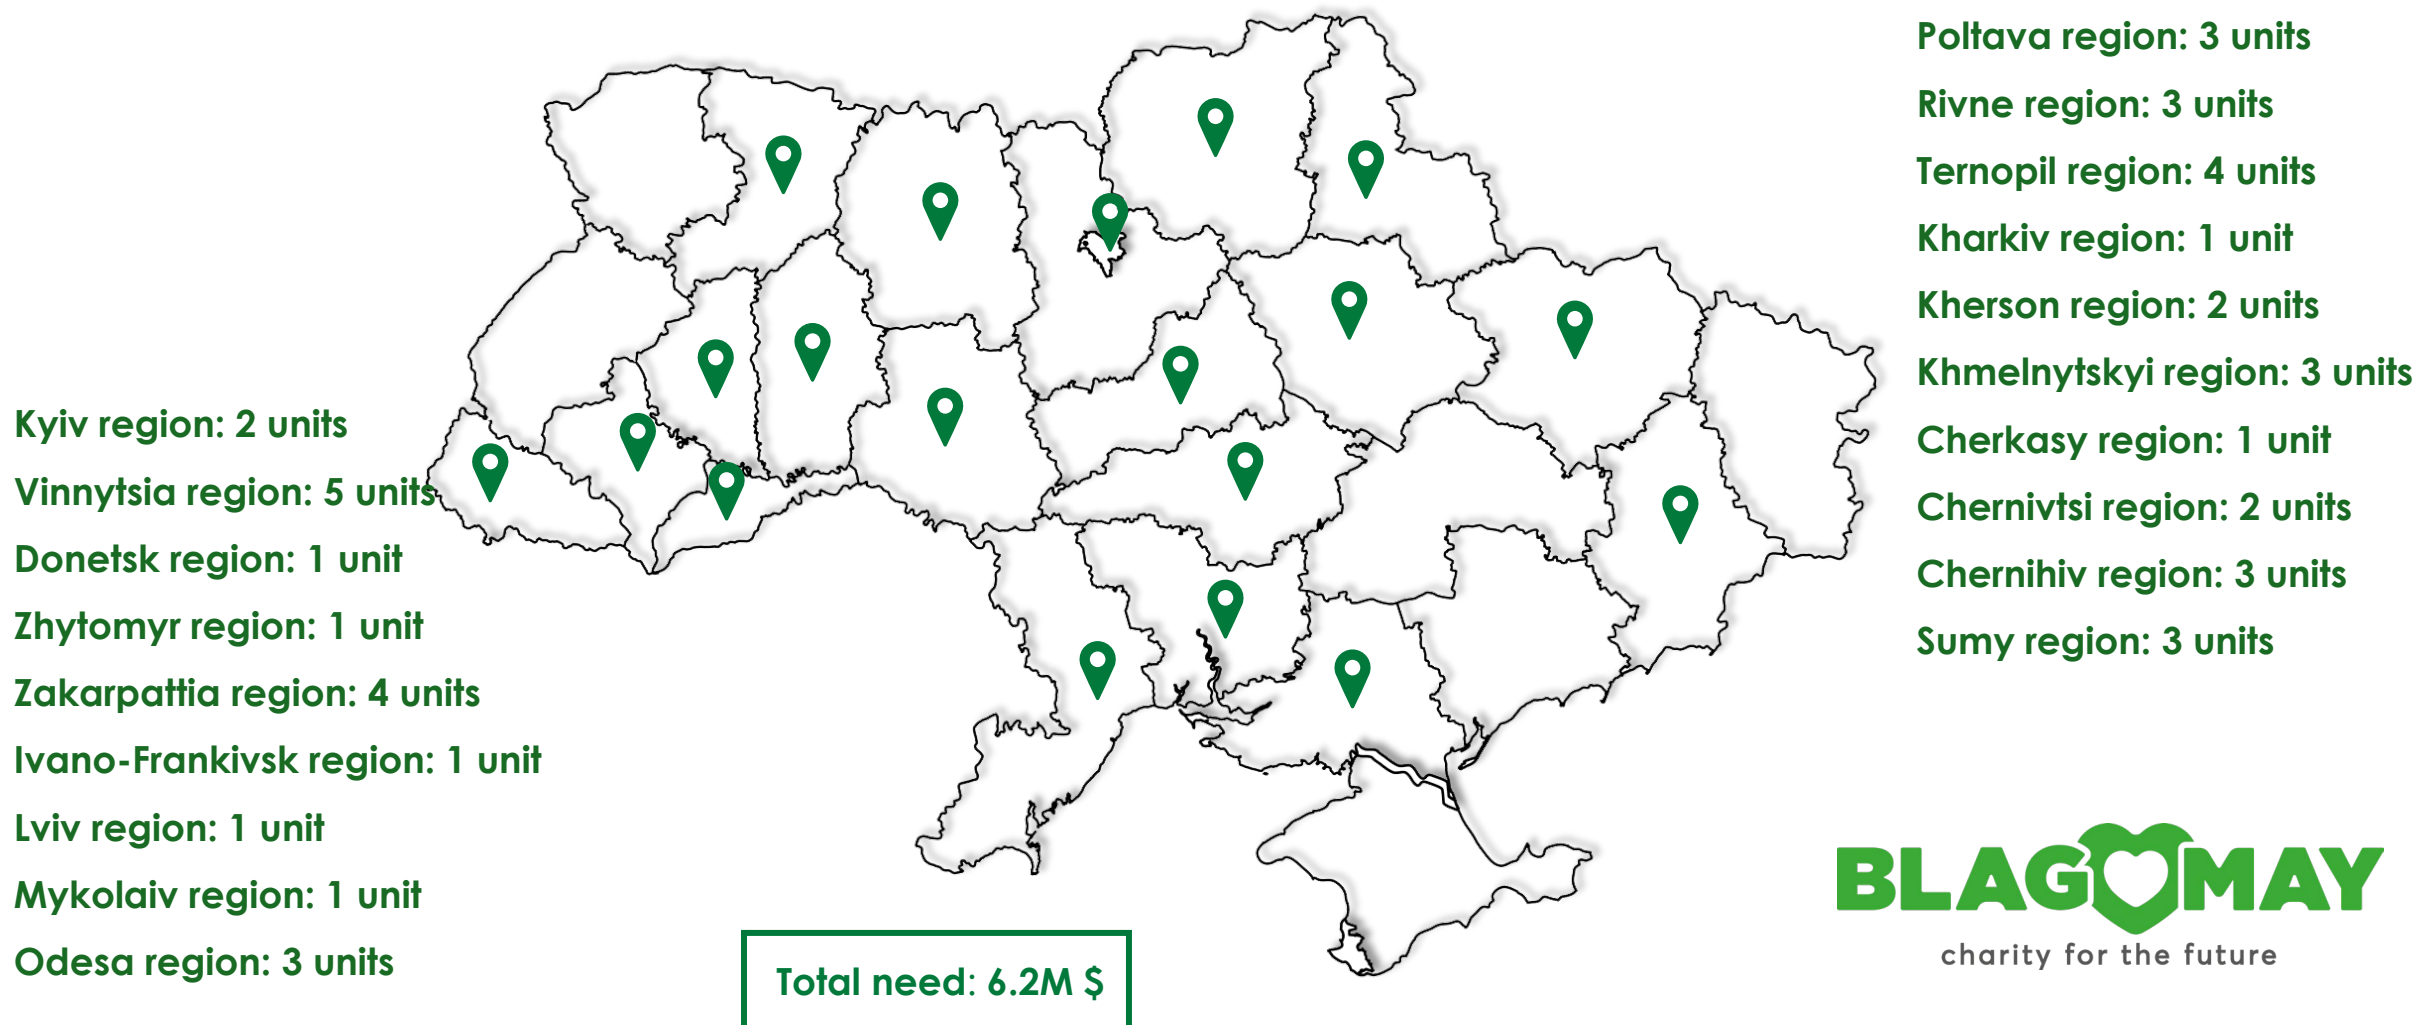

To ensure the immediate and safe transportation of newborns in critical conditions to specialized medical facilities, which will save the lives of infants, reduce infant mortality rates, and improve the quality of medical care in Ukraine.

## Current Need

Currently, there is a need for **44** neonatal ambulances in Ukraine:

**The cost of one ambulance is 140K \$.**

# Contacts

Please feel free to get in touch with us through any of the following means. We'll be happy to answer all your questions:
