## ACCOUNTABILITY OF FUNDANICA

Year 2025

Project at GlobalGiving

Help Save Children with Cancer in Venezuela

Organization #103786

Project # 68475

Dear Godparents, Allies and Partners,

With deep gratitude and fulfilling our commitment to management, transparency and effectiveness, we present our 2025 Accountability Report for our GlobalGiving project:

***Help Save Children with Cancer in Venezuela***

In 2025 we joined GlobalGiving, we started the path of fundraising and support at a global level. With continuous learning to increase our capabilities and impact.

In this accountability, they will be able to validate the immense value of each contribution, the investment in the project and the indicators of the population of children with cancer served.

In 2025, 114 good-hearted people gave their economic contribution and trust to our project on the GlobalGiving platform.

In 2025, FUNDANICA was able to help more than 144 patients between 0.1 and 18 years old who suffer from 10 types of childhood cancer and who are in the Diagnosis, Treatment and Follow-up phase for up to 5 years after remission.

Thanks to their generosity, it was possible to reduce the average childhood cancer mortality rate among children treated by FUNDANICA to 30%, compared to the average in Venezuela of 50%. In terms of investment, the contributions entrusted to us through GlobalGiving covered 24.33% of the investment made for the comprehensive care of FUNDANICA's 144 patients.

In this new year 2026, the challenge continues to be to increase the impact by helping more children for early diagnosis, timely and quality treatment and follow-up exams of the disease after remission, to raise the survival rate in Venezuela to 60%. In developed countries, the survival rate is already as high as 90%.

There are no updated official figures on the exact number of children with cancer in Venezuela for 2025. However, in Latin America there are an estimated 30,000 new cases per year and the latest data available for Venezuela indicates that around 2,600 new cases are diagnosed each year in children under 15 years of age. Cancer continues to be the main cause of infant mortality due to late diagnosis, difficult access to treatment due to the high cost of the disease, lack of availability of resources in the public health network and family poverty (by December 2025 the minimum wage in Venezuela is US\$ 0.50).

Childhood cancer is curable, it is not preventable; It's an unexpected visitor!

You, some identified and others anonymous, are the heroes of our little ones.

On behalf of children with cancer, their families and the FUNDANICA team,

**INFINITE THANKS!!**

Marisela Uzcátegui
