Management Report as of 09-30-2025
FUNDANICA Project
Helps Save Children with Cancer in Venezuela

LÍAN TORRES
8 years.
Has retinoblastoma in the right eye

SANTIAGO DAVID DIAZ ÁLVAREZ

She is 11 years old and belongs to the Venezuelan child population in conditions of poverty.

In 2022 he was diagnosed with "Common Acute Lymphoblastic Leukemia". He was treated with chemotherapy. In June 2025, he received a bone marrow transplant.

In September 2025 he achieved remission overcoming the disease.

Dear Godparents,

It is with deep commitment and gratitude that we present this Management Report (January-September 2025), which accounts for the fate and impact of their invaluable contribution to help save children with cancer in Venezuela.

We currently serve 140 children between the ages of 0.1 and 18 years, who suffer from 9 types of cancer and are in one of the 3 phases of the disease journey (diagnosis, treatment and follow-up until remission).

You, some identified and others anonymous, are heroes who have allowed us to help comply with the protocols of patients, which with the Medical Order refer oncologists and hematologists from allied hospitals, to facilitate their compliance since these requirements are very expensive and are not available in the Public Health System.

These children are of limited resources and belong to vulnerable families affected by the humanitarian crisis that the country is going through.

Childhood cancer is curable, it is not preventable, it is an unexpected visitor! In Venezuela, about 2,600 new cases of childhood cancer are diagnosed each year in children under 15 years of age.

Each donation to FUNDANICA is entirely destined to patients, giving them the opportunity and hope to overcome the disease.

As a testimony of what we can do together, we review with immense joy the achievement of the remission of SANTIAGO DÍAZ, one of our little ones who has managed to overcome the disease in 3 years of treatment.

FUNDANICA, as a GlobalGiving partner institution since January 2025, has added the generosity of 79 people who have generously contributed 5.69% of the resources of the comprehensive patient care program.

On behalf of children with cancer, their families and the FUNDANICA team, INFINITE THANKS !!

*Marisela Uzcátegui
