01 PROLOGUE

OBHIZATRIK is a non-profit organization (NGOAB Reg no. 3301, Society Reg no. S-12013) that is dedicated to tackling the numerous socio-economic challenges that confront Bangladesh. Our primary objective is to create a positive impact on the lives and livelihoods of underprivileged individuals and families living below the poverty line.

Through various short-term and long-term initiatives, we have consistently demonstrated our commitment to improving the socio-economic landscape of Bangladesh. Our efforts are focused on achieving Sustainable Development Goals 1-5, which include eradicating poverty, reducing hunger, promoting good health and well-being, and providing quality education for all.

We have a history of successfully completing both short- and long-term projects and campaigns. Our six programs cover a wide range of initiatives:

1. Education Program
2. Health & Nutrition Program
3. Livelihood Program
4. Community Development Program
5. Emergency Response
6. Climate Action

For over a decade, OBHIZATRIK has made significant progress in its mission to help the impoverished. A few highlights of our accomplishments include:

- *Assisted over 10 million people living in poverty
- *Provided high-quality, free education to 600 children across three campuses
- *Empowered more than 1,350 families through the SHOKKHOM livelihood project in 11 districts
- *Provided basic medical care to more than 10,000 individuals at no cost
- *Offered basic medical assistance and emergency transportation services through the Boat Ambulance program in the remote coastal regions of Barisal, Bangladesh.

OBHIZATRIK Foundation strives to aid the marginalized poor of Bangladesh so that they may break the barriers of poverty and become economically viable. Our projects are supported by more than 3500 volunteers spread across Bangladesh and funded by more than 800 donors and 50 corporate sponsors across the nation and worldwide. With their unwavering support, we are hopeful to make a positive change in Bangladesh.

SHOKKHOM

1350+
beneficiaries in
11 districts

Mission

To assist the underprivileged overcoming economic limitations by offering them access to quality education, free healthcare facilities, and small sustainable enterprises.

Vision

To eliminate mass poverty in Bangladesh by providing practical skills, education, and resources to empower citizens to be self-reliant and independent. We also strive to support the youth and encourage volunteerism to reallocate skills and resources for the growth and development of the nation.

Objectives

1. Providing free access to quality education to enhance accessibility for all.
2. Developing fully functional livelihood models at zero cost to increase income-generating opportunities.
3. Ensuring food and nutritional security by supplying free grocery items, fresh produce, and cooked meals.
4. Offering free health check-ups, medicine, and medical services to make healthcare facilities more accessible.

“

COVID had been a curse to me. Even though there were shortages in money and resources, before COVID, life went on. And then the pandemic hit. There was no work for me. My previous van business collapsed and I was forced to sell my most precious tool of trade, my van. After the pandemic, when every one else's life started to return in the previous state, mine did not. I didn't have my own van and was knee-deep in debts, until I found out about OBHIZATRIK Foundation. Now, I have my own van instead of having to rely on rented ones. Every day is a struggle, but bit-by-bit things are starting to turn around as I've started to see profits and am able to pay off my debts. Having your own van really makes a difference both on mental peace and the profits you make.

”

Md. Lutfor, Van owner, SHOKKHOM 969, Mirpur, Dhaka

What is SHOKKHOM

Bangladesh is a top developing country with over 170 million residents, 40% of whom live below the poverty line, posing a significant obstacle to the nation's progress. Despite numerous socio-economic challenges, OBHIZATRIK Foundation decided in 2016 to create SHOKKHOM, a project aimed at empowering the extreme poor with free-of-cost, fully developed business models.

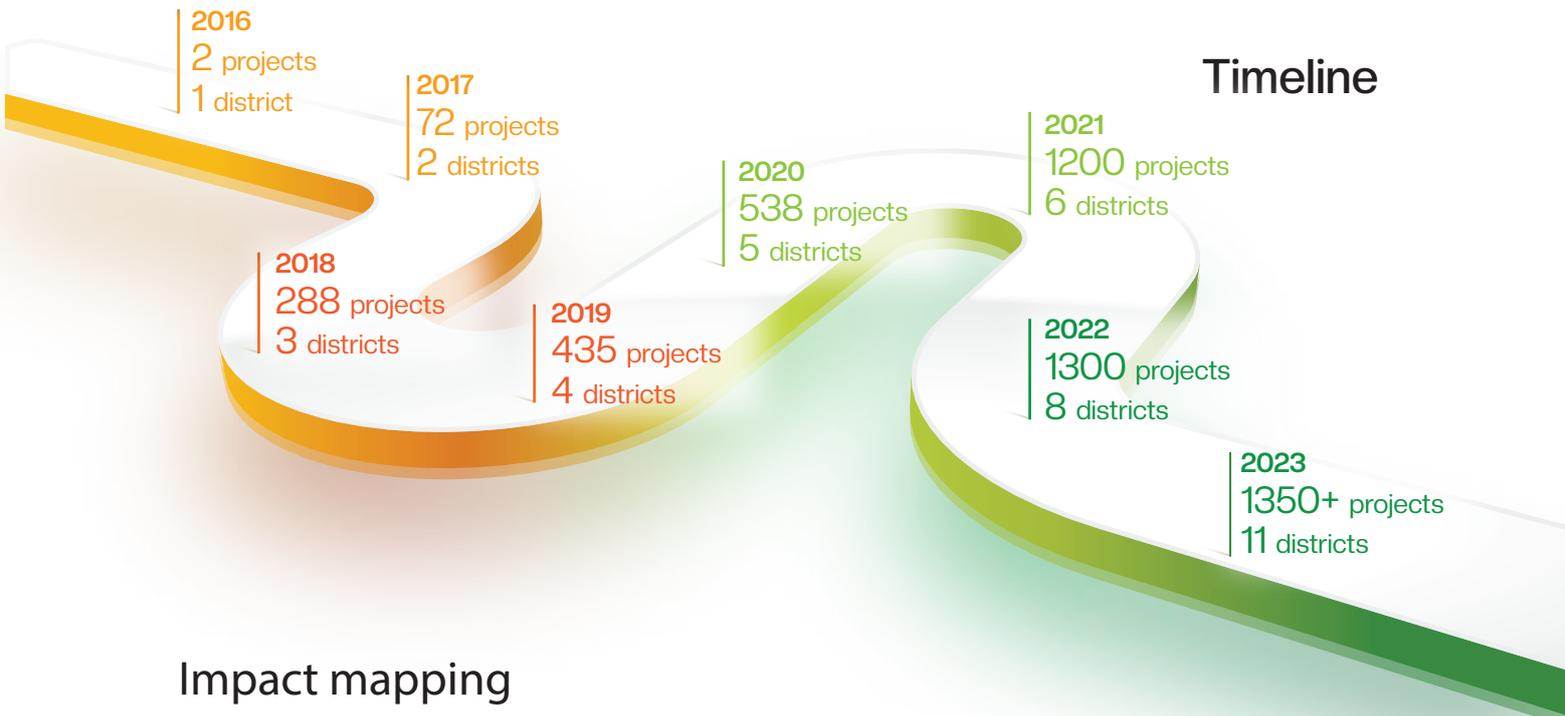

The main goal was to reduce poverty levels and increase employment opportunities for disadvantaged and destitute people. During the initial implementation phase, SHOKKHOM was tested on a small scale with only two families. The results were promising, with beneficiaries generating a profit and making further investments in their businesses. Encouraged by its success, SHOKKHOM expanded its reach to eleven districts in Bangladesh from 2017 to 2023, and now, after almost seven years of operation, it has helped 1,350 beneficiaries lift themselves out of poverty.

Birth of SHOKKHOM

When SHOKKHOM first began, its projects were financed solely by Zakat contributions from generous donors. Zakat is an Islamic financial obligation that requires Muslims who are financially able to donate a percentage of their income and assets annually to charitable causes. SHOKKHOM's objective was to utilize Zakat funds to create sustainable, positive impact. To ensure lawful and strategic utilization of Zakat, the organization established a Zakat committee.

As time passed, SHOKKHOM's projects began to generate significant benefits for their beneficiaries, drawing attention and admiration from people across the nation. Here was the opportunity to scale it up further as many people from diverse cultural and religious backgrounds expressed interest to contribute to our cause. Our patrons now include diverse group of donors and sponsors from various religious, ethnic, and cultural backgrounds. This support enabled the OBHIZATRIK Foundation to execute more than 1350 successful projects, thus providing these families hope for prosperity.

SHOKKHOM process

At SHOKKHOM, every project undergoes a careful process consisting of several stages such as discussion, interviews, evaluation, and monitoring. The entire process is strictly observed and approved by our established Zakat board, which consists of five reputed Islamic scholars with extensive knowledge of Zakat and its distribution. Each project follows the same working process, which is executed horizontally, and involves the SHOKKHOM team, donors, and potential beneficiaries. Here's a brief overview of the steps involved:

1. Mutual discussions between the SHOKKHOM team and potential donors are held, where donors can ask any questions they may have. Our team guides the donors in choosing a project or multiple projects to contribute to. Simultaneously, the candidate processing team carries out necessary actions to bring in applicants for SHOKKHOM.
2. After the initial discussion and selection, our team accepts the Zakat funds given by the donors.
3. The candidate processing team conducts a three-step evaluation of each potential candidate, which includes a primary interview, a home visit, and a final interview.
4. Once the Zakat fund is handed over, and the candidates are duly evaluated, the processing team creates detailed profiles containing necessary information about the potential beneficiaries.
5. Our SHOKKHOM team shares these profiles with the Zakat donors for credibility and clarification purposes.

Our process ensures that every project is executed with utmost care and transparency, while fulfilling the spiritual obligation of Zakat.

For the sake of transparency in the use of Zakat funds, the SHOKKHOM project has established a dedicated Shariah board. This board, made up of expert members from various Islamic institutions in Dhaka, Bangladesh, is responsible for ensuring overall transparency, justice, and adherence to Shariah rulings in the distribution of Zakat. As of 2019, this board is still actively serving its purpose.

1. Ensure that the distribution and transfer of Zakat funds follow Shariah rulings.
2. Evaluate potential Zakat candidates and projects.
3. Determine if an individual is eligible to pay Zakat and provide justification.
4. Calculate Zakat based on the donor's assets.
5. Address and clarify any inquiries from donors regarding Zakat.

SHOKKHOM
MODELS

SHOKKHOM is committed to providing diverse business models that cater to the needs of individuals with different skills and capabilities.

One of the key ways that SHOKKHOM achieves this goal is by offering a range of training and development programs that help individuals grow and develop their skills. These programs are designed to be accessible and inclusive, so that individuals from all walks of life can participate and benefit.

In addition to training and development, SHOKKHOM also places a strong emphasis on partnerships and collaborations. By working with other businesses and organizations, SHOKKHOM is able to leverage the strengths and expertise of others to create innovative and impactful solutions for the extreme poor.

Overall, SHOKKHOM is dedicated to fostering a culture of inclusivity and diversity in all aspects of its operations. By valuing and supporting individuals with different skillsets and backgrounds, SHOKKHOM is able to create a dynamic and thriving community that benefits everyone involved.

Currently, there are four broad categories of SHOKKHOM business models:

1. Transportation-based models
2. Small and Medium Enterprises (SMEs)
3. Agro-based models
4. Livestock business models

Under each broad category, SHOKKHOM offers various livelihood models. Candidates are trained for the particular model they applied for, giving them a head start on their journey to financial self-sufficiency. Once all assets for the model are transferred, OBHIZATRIK Foundation maintains consistent contact with beneficiaries to keep up-to-date with their progress.

Multiple surveys, interviews, and analyses are documented quarterly, half-yearly, and annually. These reports provide useful documentation to check which candidates are doing better and which need further assistance in their businesses. They are also shared with our patrons who supported the SHOKKHOM projects.

Transportation based models

446
projects in

8
districts

Livelihood models under this category are targeted mostly at city-dwelling candidates, where rickshaws, vans, CNGs, autorickshaws, motorbikes, etc., are popular. These modes of transportation are often used for small-scale businesses such as food delivery, courier services, and transportation of goods. They provide an affordable and convenient option for those looking to start their own business or generate income. The following transportation models are available to start the journey of financial self-sufficiency:

1. Rickshaw project
2. Van
3. CNG
4. Autorickshaw and easy bike
5. Motorbike and car for ride-sharing
6. Boat for fishing

Small Medium Enterprise

572
projects in

8
districts

Under the SME livelihood model category, OBHIZATRIK Foundation offers full setups of small to medium businesses for its candidates. These setups may include portable shops (on vans), permanent shops, and various equipment of trade (e.g., sewing machines, computer setups in shops, shop items and goods, etc.). Candidates may apply for a complete business setup or equipment and goods for their existing stores. The following SHOKKHOM projects are available under the SME category:

1. Business on a van
2. Sewing machine
3. Tea stall
4. Grocery shops
5. Business on a boat
6. Small shop
7. Food stall

Livestock-based models have proven to be successful in improving the lives of many families in both urban and rural Bangladesh. SHOKKHOM's approach is unique in a way to use Zakat funds to provide families with livestock animals thus making it easier for them to start their own livestock business. Through this program, families are able to become self-sufficient and improve their overall quality of life. Additionally, the program has a positive impact on the local economy, as families are able to sell their products and contribute to the overall growth of the community. The different projects under this category provide candidates with:

1. Cows
2. Goats
3. Sheep
4. Poultry setups for chickens or ducks
5. Fisheries and supplies

Being an agricultural country, farming is a highly prospective sector in Bangladesh. But most of our farmers cannot afford to have their equipment or own lands to farm. For the rural farmers, SHOKKHOM provides the following livelihood projects:

1. Land cultivation setups
2. Power tiller
3. Equipment for cultivation

Empowering Women

To empower women, OBHIZATRIK Foundation started the specialized project, SHOKKHOM Nari. A large number of women in our country suffer from poverty and are dependent on their fathers or husbands to survive. These women suffer from conditions so poor that they can't even afford basic necessities. SHOKKHOM Nari offers special projects targeted towards these women so that they can start a business on their own and escape poverty.

The SHOKKHOM Nari project has been incredibly successful in empowering women and giving them the tools they need to become self-sufficient. Through this project, women have been able to start their own businesses and provide for themselves and their families. This has not only improved their financial situation but also boosted their confidence and self-esteem.

The training sessions provided by SHOKKHOM Nari cover a wide range of topics, including business planning, marketing, financial management, and communication skills. The candidates are also provided with ongoing support and mentorship to help them overcome any challenges they may face in their entrepreneurial journey.

The impact of SHOKKHOM Nari can be seen in the success stories of the women who have participated in the program. Some have started successful small businesses, while others have expanded their existing businesses and increased their income. The ripple effect of empowering women in this way is immeasurable, as it not only benefits the women themselves but also their families and communities.

By providing them with the resources and support they need to start their own businesses, we are empowering them to take control of their lives and break free from the cycle of poverty.

SHOKKHOM Nari projects include:

1. Fabric/Clothing business setup and supplies
2. Farming for Women
3. Handicrafts business setup
4. Embroidery and tailoring business
5. Plant nursery setup
6. Home-made food supply business
7. General store setup
8. Boutique shop setup

Stories of successful SHOKKHOM NARI

Arts and crafts have always been dear to me. When I was younger, I learnt sewing from my mother. Since then, I've always loved to sew and make things like dresses for kids, beady bracelets and small jewellery. I've always dreamt of turning my craft to a business. But supplies cost a lot and we hardly could afford them. Thanks to OBHIZATRIK, I've got a full shop setup with supplies now and am finally able to run my own handicrafts business.

Ever since my husband passed away, I had to fend off for myself. I used to work as a house helper, but due to my health issues I was unable to after a few years. With OBHIZATRIK's help, now I run a small store near my house where I sell various snacks and food items. The store makes me enough to pay off rent and buy groceries. Sometimes when I make enough profit, I'm also able to buy gifts for my grandkids. It is a blessing to me!

SHOKKHOM success stories

OBHIZATRIK Foundation not only built a whole shop for me, but also provided all the supplies and items for my new store. This initial help meant a lot to me, as it got me started. Selling items from the store, I'm now able to make enough for my family as well as purchasing new items and also even make small investments. I am planning to invest in a better cooking setup next year so that I can serve warm snacks to my customers. *-Ismail Sikder, Tea stall*

When I applied for the Goat project, I received two goats. A few months ago, my goat gave birth to two calves. It was a very happy news for me! I have plans to rear them up so, I can sell them in the upcoming Eid haat. With enough goats I can also start making and selling goat cheese which is very demanding in the cities. *-Farzana Akhter, Goat owner*

Rickshaw

I've been trying to save up for purchasing a rickshaw, but it costs a lot. Thanks to OBHIZATRIK, I now have a rickshaw for free. On a busy day, I make as much as 1500 taka! Overall, I can make enough to feed my family and send the kids to school.

-Yusuf Mollab, Rickshaw owner

Van

I had a van before, but I had to pay rent for it. At the end of the day, most of my profits went to pay off rent. But now, with the help of OBHIZATRIK, I have my own van. I sell fish around the streets of Pallabi and get to keep the profit I make.

-Mr X, Business on van

Livestock based

I could never afford to purchase a cow by myself. But now I have one which gives enough milk to sell off in the market and at households. My wife and I are also planning to make dairy based items like ghee in the future.

-Quddus Mia, Cow farmer

SME

With three school going kids, it had become difficult for my husband to manage livelihood by himself. To help him, I applied for a small shop in OBHIZATRIK. Now I'm able to earn enough from my shop to regularly buy groceries and the children's educational items. I'm able to lift off a great burden from my husband's shoulders.

-Anjuman, Shop owner

Future goals & objectives

Since its establishment in 2016 with only two projects, OBHIZATRIK's SHOKKHOM initiative has made significant strides. Fast forward to 2023, and the project has expanded to over 1,350 SHOKKHOM initiatives spanning eleven districts in Bangladesh. Through SHOKKHOM, nearly 2,000 women have lifted themselves out of poverty. By creating a sense of community and solidarity, SHOKKHOM has helped women to gain confidence and develop new skills. In addition to the direct benefits to the women involved, SHOKKHOM has also had a positive impact on their families and communities. By increasing women's economic independence, the initiative has improved the living standards of entire households.

Our ambition is to maintain our current growth rate, expand SHOKKHOM to 3,000 projects by 2030 and reach 30 districts in Bangladesh. OBHIZATRIK is committed to continuing its work with SHOKKHOM and expanding the initiative to even more women and communities in Bangladesh. By empowering women and fostering community development, we believe that SHOKKHOM can play a key role in creating a brighter future for all.

“

In this time and world of inflation, making ends meet for a poor person like me was extremely challenging. On top of that when you have a school-going son, the costs can be very hard to bear. My husband is a day labourer whose earning is very minimal. After paying off house rent and my son's school fees, sometimes we had to stay hungry for entire days, as we couldn't afford food. As a mother and more importantly as the woman in my house, I knew I had to do something, something that will bring some ease to this financial struggle we were facing. That's when I discovered OBHIZATRIK Foundation through a neighbour. With the cow given by the organization, for free, I'm able to sell milk and make money. It feels great to be able to contribute to the family financially.

”

Testimonials from patrons

Compared to interest-based micro-credit programs of neoliberal NGOs, zakat-based social-welfare program, Shokkhom, by Islamic NGO Obhizatrik Foundation, is more efficient in ensuring welfare of its group members.

-A. I. Mahbub Uddin Ahmed
University of Dhaka, Dhaka, Bangladesh
In the research paper: *Islam, Neoliberalism and Social Inequality in Bangladesh: A Social Policy Perspective*

One of the impactful initiatives by OBHIZATIRK Foundation that we had the opportunity to visit is their Zakat Based livelihood model, SHOKKHOM. This innovative project harnesses the power of Zakat funds to create sustainable livelihood opportunities for the less fortunate. We applaud OBHIZATIRK Foundation for their strategic utilization of Zakat, which not only helps those in need but also empowers individuals to uplift themselves from poverty.

-M Fazlul Karim
Country Coordinator, Bangladesh

Under the direction of their Shariah Board and with the assistance of Islamic scholars, OBHIZATIRK has been carrying out their livelihood-based project SHOKKHOM. Through the wonderful project implementation, they have been effectively empowering the impoverished and in need individuals.
