

This quarter we had one new activity.

- 1) Preparing Armenian students to the participation of Junior Balkan Mathematical Olympiad which will held in June 15-20 in Romania.

Also, we continue our other projects.

### Website Development

Since huge increase of AI performance in website development we upgraded our website development project and now we are creating huge portal with gamification elements. Below are 2 screenshots.

### Collaboration with Mathematics

#### Teachers

In March, April and May we continued working with school teachers. Teachers conduct math circles in their schools for Grades 5-8 students.
