

this is how your contribution can improve the social and economic conditions of vulnerable people in rural areas.

ESMA is supporting people with disabilities especially women and children so that they can be able to take care of themselves.

**Fg1: Letiru (deaf),
2 : Tule (physical disabled). Both received each, one sawing machine (SINGER)**

Local materials for local people. Three disabled students at ESMA received tricycle. This is one of the ways of supporting their education. With tricycle they are able to go to the nearest school and stay clean and healthy.

We invite you to stand alongside the unreached groups, considered to be the poorest among the poor, to bring hope to the marginalized, to enable the excluded to have access to education and to be cared for and rehabilitated in their community. This is the summary of the mission, vision and the value of ESMA for the advancement of people with disabilities in their local environment in the northern Democratic Republic of Congo

Jean-Claude 10 years old, said "since my father brought me to ESMA, I am very happy to be in school, because at home in our village when visitors come to our house, parents tend to hide us. In our family there are two children with disabilities I and my elder sister who also studied at ESMA. We did not have access to games like football which I love. I am studying well and I am in second grade class. I thank those who support ESMA helping us to study, through education we can build and transform ourselves our future.
