METHODOLOGY CONSULTS

FELLOWS' TESTIMONIALS

I like that during individual meetings with my mentor, we discuss deep topics that are important to me. They help me to ask myself difficult questions that require deep self-analysis and self-reflection not only about my teaching, but also about my personality

I thank the entire team for your dedication (time, emotions, guidance) that you invest in us.

Meetings with a mentor are my safe space to reflect on everything that is happening, and this is the most valuable contribution to my development.

I thank the team for their clarity and incredible care for us, our present, and future.
