# About the project

## Project launch

The project started in late 2022 as a collaboration between the Fund and local volunteer organizations.

## Project goal

Our common goal is to support the most vulnerable people by providing them with basic nutrition.

## Geography of activity

For almost **two and a half years**, we have supported **15 food outlets in 9 cities of Ukraine**.

## Those who received help

During this time, more than **2,000 people** received hot meals and more than **190,000 meals** were distributed.

## Resilience in times of crisis

Despite the ongoing war and economic difficulties, we have managed to keep the project operating and provide support to those who need it.

## Ensuring the work of the outlets

The Fund provides food, drinking water, disposable tableware, kitchen utensils and the necessary equipment for cooking and serving meals.

## Food outlets: support in the most difficult times

Most of the food outlets operate outdoors. Volunteers are on the spot in any weather, because they are always required.

The food outlets provide reliable support: by word, deed and a kind smile.

Sometimes, when there is no electricity or water, with air alerts and explosions, food have to be prepared. It is a volunteer responsibility to serve meals even in the most difficult conditions, because someone's life depends on it.

The dishes are prepared from the heart, as home-made. Among the most traditional are Ukrainian borsch and pasta with meat.

# The products we buy
