To,
Mr. Ikaramullah Qureshi
Chief Engineer
Irrigation, Department
Sukkur Barrage, Left Bank

Subject: Request for Collaboration and NOC for Urban Forestation Project at Rice Canal, Keerthar Canal and Dadu Canal left bank

Dear Sir,

I hope this message finds you well. I am writing on behalf of Pahel Pakistan, a non-governmental organization committed to sustainable development and environmental conservation. We are currently planning an **Urban Forestation Project** aimed at promoting green spaces in Sukkur, with a focus on reducing the impacts of urban heat and improving the overall environment.

In line with SDG 11: Sustainable Cities and Communities and SDG 13: Climate Action, this project intends to create sustainable urban spaces by enhancing greenery along the Canals and riverbanks. These areas have been identified as potential sites for creating urban forests that would help in mitigating climate change, improving air quality, and reducing the urban heat island effect in Sukkur.

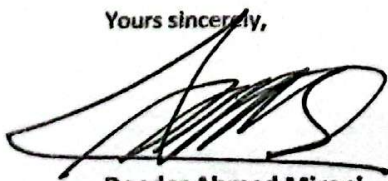

By introducing green spaces, this project will contribute towards improving the local climate resilience and creating a healthier urban environment. Furthermore, the establishment of these green zones will encourage biodiversity, promote sustainable urban planning, and provide recreational spaces for the community.

To proceed with this initiative, we kindly request your esteemed department's support and collaboration, as well as a No Objection Certificate (NOC) for the execution of this project along the riverbanks of the **Rice Canal, Dadu Canal and Keerthar Canal** into thriving urban forest. Your approval is crucial for the successful implementation of this project, which aligns with national and international goals for sustainable urban development and climate action.

We are confident that this collaboration will bring long-term environmental and social benefits to Sukkur and contribute positively to the achievement of the Sustainable Development Goals.

Thank you for your attention to this matter. We look forward to your support and a positive response.

Yours sincerely,

Deedar Ahmed Mirani
Founder & Chief Executive Officer
Pahel Pakistan
