Basic needs of families

The Foundation supports 1000 families with food on a monthly basis.

In addition to providing food packages, we refer families to the Foundation's partners who provide professional psychological and legal assistance. We promote quality medical care by providing escorts to medical facilities.

Our team also helps with the all-round development of children. We are constantly searching for the necessary resources, services, courses and training programs, providing children with the opportunity to join creative and interesting initiatives.

Holidays for children

In cooperation with its partners, the Foundation organizes festive events for children from foster families and families in difficult life circumstances.

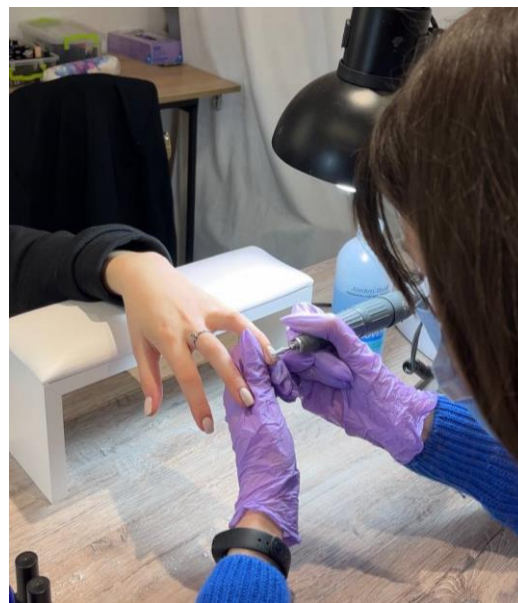

Educational projects for children

The main goal of the project is to prepare a child from a foster family for independent living, helping to develop their potential and self-confidence.

The Foundation engages various educational organizations and platforms to educate children and help them acquire a future profession.

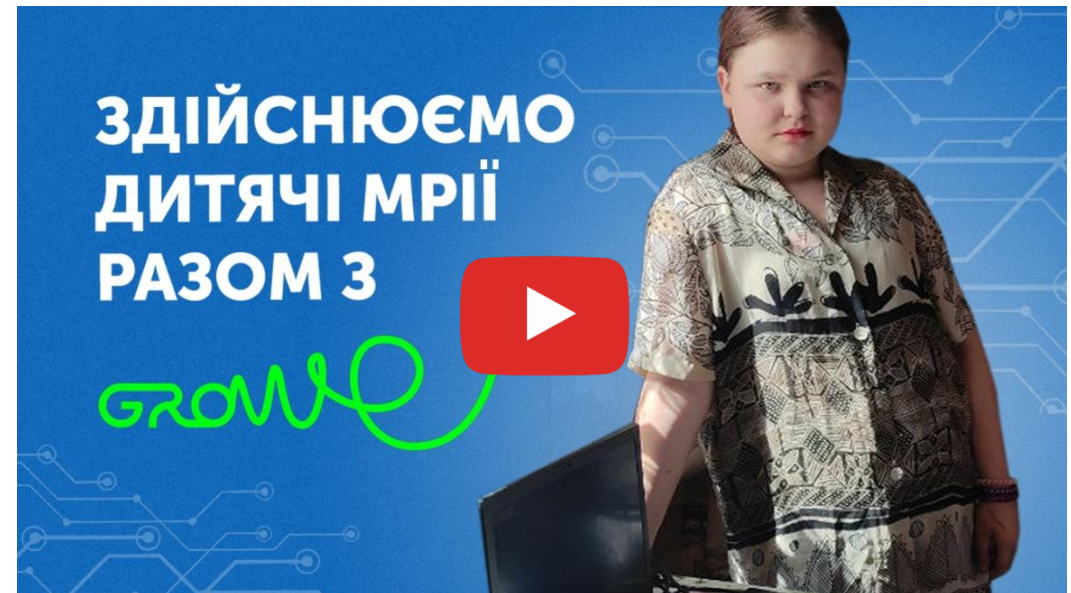

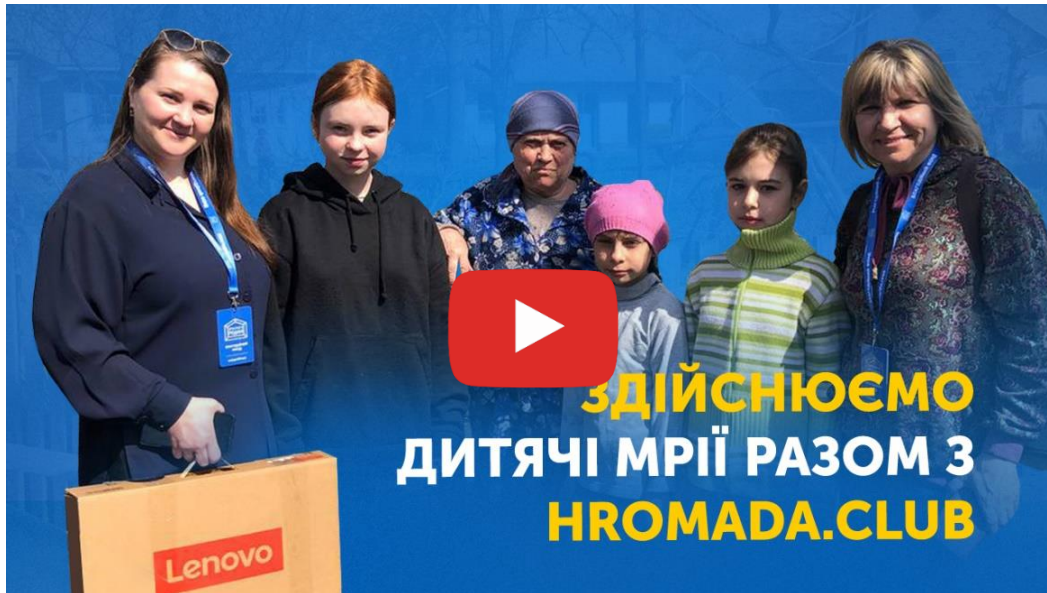

Providing children with gadgets for learning

Modern gadgets are an integral part of the learning process and a window into the world of the nobility. And we are making every effort to ensure that children from foster families get even more opportunities for development.
