NEED ASSESSMENT FORM/SITUATION ANALYSIS FORM

FILL the following questionnaires with much information as needed.

1. Please give the project details including benefiting district, sub county and village/cell

District... BUTEBO Subcounty... KANGINIMA TOWN COUNCIL
village... TINGOL

1.1 Beneficiary representative details

Name of person given in Land for water

well... RAMADAN MAGNIERE

Tell: 0783992296

Name of Neighbor where water well is

dug... KIMUMWA ABDRAHMA

Tell: 0759118675

Email: NONE

Coordinates: 1.1993° N, 33.9812° E

2. What are the economic activities carried out by the people within this proposed locality?

Agriculture

Block laying

Poultry Farming

3. What is the current problem facing the people within this locality?

Water Scarcity

Poor Road network.

Poor Infrastructure development.

4. If water problem, what is the current source of water in the area?

Stream water

Rain water that is if it rains

5. What is the distance of the nearest water source by the surrounding households?

3 Km.

6. How many people benefit from the current water source?

1559 According to the local Council report.

7. Is the current water source, a shallow well or deep well/borehole? If not any of these please elaborate what is it?

Stream water. This is water from under ground.

8. What do you think could be done to alleviate the current situation?

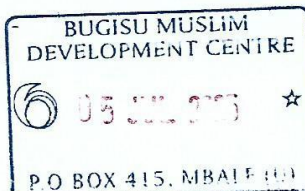

Extension of a clean water project in form of a well borehole, shallow well, deep well etc.

9. If supported, please how many households and individual beneficiaries will benefit from this kind of support?

(i) Households... 250 And (ii) individual beneficiaries... 1230.

10. Will the community people get involved when implementing this project if so how will they get involved?

Before a project is implemented in the area, we first do a community sensitization awareness meeting on how the project will be implemented, how the water well will be managed. We trained Village Health team who will also train the community on the water usage. The water user Committee will have our contacts in order to provide us with the feedback on how the water well is functioning.

Official use only

BMDC COMMENT.

BMDC would recommend that this village be extend a clean water project due to the fact that water borne disease cases are ~~ramp~~ many in the area according to VHI's report. The management also based on the 3km distance ^{to access clean water} that this would be evidence enough to recommend a clean water project in the area.

The Community's economic activities, brick taping, poultry keeping and farming were among the justification to support the decision of providing clean water source in form of a Borehole to this Village.
