What Transends Leaves Footprints

Our project continues providing comprehensive support for people living with HIV, addressing not only medical needs but also emotional, social, and structural barriers. Through psychological counseling, nutritional support for infants, and inclusive sexual education, we aim to reduce stigma and strengthen community resilience.

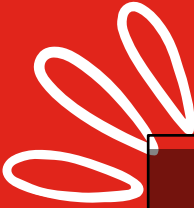

“Every child deserves more than survival—they deserve love.”

This period, our work directly benefited over 230 individuals across different communities. Beyond numbers, the project continues to transform lives by breaking down stigma, empowering families, and ensuring that children and youth grow up with knowledge, protection, and hope.

We thank our donors for believing that to be an HIVlife partner is possible. Every contribution—whether \$25 for counseling or \$200 to support a child in a foster family—creates lasting change. Together, we are building a future free of stigma and full of opportunities.

Thank you!
