

PAKISTAN FLOODS - 2025 SITUATION REPORT

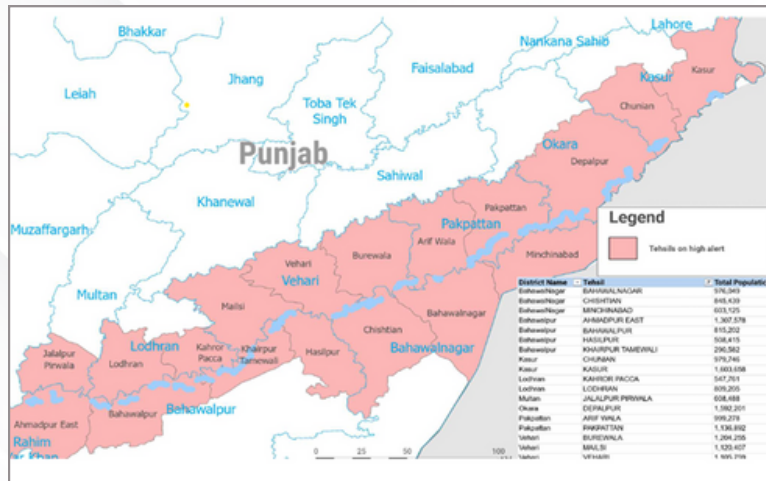

Source: UN OCHA

SITUATION OVERVIEW

Worsening monsoon conditions continue to devastate Pakistan, with heavy rains, flash floods, and landslides causing widespread damage nationwide. The death toll is now **805** since late June 2025. Over **1,100** people are injured, while **7,828** homes have been destroyed.

Punjab has been placed on high alert, with over **200,000** people evacuated from vulnerable areas due to rising water levels in the Sutlej, Ravi, and Chenab rivers. Meanwhile, in the northern regions, continued downpours, flash floods, and landslides have severely impacted communities, with access hampered by washed-out roads and collapsed infrastructure.

The Pakistan Meteorological Department (PMD) warns of continued heavy rainfall through late August 2025, with heightened risks of flash floods and landslides. Authorities urge strict vigilance and compliance with evacuation protocols in high-risk areas.
