

Aimsir Foundation Project Overview

Project Title:

Expand. Elevate. Empower Future Aviation Leaders

Project Summary:

This project opens doors for young people who have the talent and passion for aviation but lack access to early training. Through mentorship, simulator sessions, school outreach, and scholarship support, students gain exposure to aviation pathways and the confidence to pursue flight training.

What Is the Problem?

Aviation excites many young people, yet the path to access it is difficult and expensive. Most students have no access to mentorship, hands-on learning, simulator time, or affordable introductory flight experiences. Without support, motivated youth never get the chance to explore aviation or take their first steps toward becoming a pilot.

How This Project Solves the Problem:

This project removes financial and educational barriers by providing mentorship, simulator sessions, outreach programs, and scholarship assistance. With the financial burden lifted, students can focus on developing their skills and exploring their aviation dreams.

Potential Long-Term Impact:

This project will create lasting pathways into aviation for students who otherwise could not afford it. Early exposure and training support help students pursue flight school, technical aviation careers, and greater long-term economic stability.

Estimated Budget (Per Student – PPL + IR):

- Private Pilot License (PPL): \$12,000–\$18,000
- Instrument Rating (IR): \$10,000–\$16,000

Total Estimated Cost: \$22,000–\$34,000 per student

Donation Options:

\$10 – Inspire a student

\$25 – Spark interest

\$50 – Support a simulator session

\$100 – Fund one hour of hands-on training

\$250 – Build early aviation skills

\$500 – Advance a student’s training

\$1,000 – Support flight lesson preparation

\$5,000 – Help fund PPL training

\$25,000 – Sponsor a full training pathway
