Ruby Akiti Ado (34), farmer, mother of five, counts on Asase Gyefo to keep her harvest strong

“

Two years ago, I tried **Asase Gyefo Organic Fertilizer** on my land for the first time and was really surprised with the results! The **soil**, which is usually dry, became **very healthy** because of the rich nutrients in the fertilizer. The crops were healthy and green and the **yield was stronger** than with using a chemical fertilizer. Higher yields mean **higher income** for us.

”

How Ruby, mother of 5, successfully runs her farm in Ghana - Safisana
