

Support Community Planting Fruit Trees in Uganda

Kampala, December 2025

By **JENGA TAIFA**

This project will plant fruit trees in rural communities in Uganda to fight climate change, improve nutrition, and create future income. By engaging families, schools, and veteran households, we restore degraded land while helping communities grow food, protect the environment, and build sustainable livelihoods.

More about our organization: www.jengataifa.org

1. Project Overview

Uganda faces increasing climate stress driven by deforestation, poverty, and limited access to sustainable environmental solutions. This project implements a one-day coordinated fruit tree planting campaign to restore land, improve nutrition, and promote environmental stewardship.

2. Problem Statement

Rural communities rely heavily on tree cutting for survival, accelerating land degradation and food insecurity. Without practical climate-smart interventions, environmental and livelihood challenges continue to worsen.

3. Project Goal and Objectives

Goal: Strengthen climate resilience through fruit tree planting.

Objectives:

- Plant 1,000 fruit trees | Improve nutrition | Promote environmental awareness

4. Project Activities

| Activity | Description |
|-------------------|---|
| Seedling Purchase | Procurement and transport of fruit tree seedlings |
| Tree Planting | Community and school-based planting day |
| Training | Basic tree care and environmental stewardship |
| Follow-up | Monitoring and replacement of failed trees |

5. Beneficiaries

Direct: 150 households and school children | **Indirect:** Community members and leaders

6. Budget Summary

| Item | Details |
|----------------|-------------------------|
| Seedlings | Purchase of fruit trees |
| Transport | Logistics and delivery |
| Planting Tools | Hoes, watering cans |
| Training | Environmental education |
| Monitoring | Follow-up visits |
