

Amahiwre Scholarship Fund

Rwanda

Omega Global Development is a U.S., faith-based 501 (c)3 nonprofit organization. Our goal is to invest in African communities through strategic initiatives that promote restoration, empowerment, and sustainability. We believe in the dignity of every person and the transformative power of community development investment.

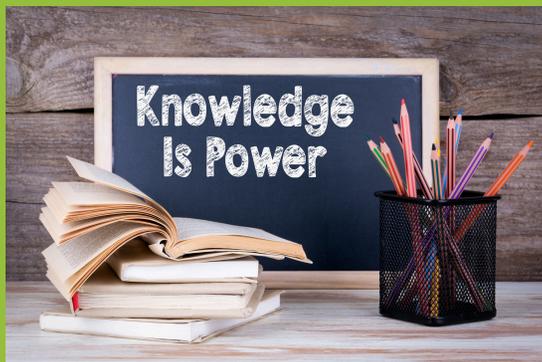

Why a Scholarship Fund? Many capable students in Rwanda gain admission to college, but they cannot afford tuition, housing, meals, and other academic costs. Because of financial barriers, students from low-income and rural families often have to delay or abandon higher education. Without access to college, young people face limited job opportunities, and communities lose future leaders and professionals.

How the Amahirwe Scholarship Fund Makes a Difference

The Amahirwe Scholarship Fund will remove financial barriers by covering tuition, housing, meals, and academic costs for Rwandan college students. By providing comprehensive support rather than partial aid, students can remain enrolled, focus on their studies, and complete their education, gaining the skills needed to build stable livelihoods and serve their communities.

Students supported through the Amahirwe Scholarship Fund will complete their college education, increase their earning potential, and gain skills needed for meaningful employment or further study. Graduates strengthen families, contribute to Rwanda's workforce, and serve as leaders and mentors in their communities, creating a lasting economic and social impact beyond the individual student.

How You Can Help

Your donation on GlobalGiving allows students, primarily women and girls in Rwanda, to continue their education by covering tuition, housing, meals, and academic supplies. Financial barriers still prevent talented students from completing college, so your support is needed. Together, we open doors to opportunity, leadership, and lasting community impact for future generations.

Thank you for your support!!
