

Urgent Financial Support for Orphan Student Pursuing B. Pharmacy

1. What Problem Will This Project Solve?

This project aims to address the financial hardship faced by an orphan student who is currently enrolled in the Bachelor of Pharmacy (B. Pharmacy) program. Having lost parental support and lacking a steady source of income, the student is unable to meet the required tuition fees and other educational expenses.

Without immediate financial assistance, she is at serious risk of discontinuing her studies. Dropping out would significantly reduce her chances of securing stable employment in the future and may lead to long-term economic insecurity and social vulnerability. This initiative seeks to remove the financial barrier that threatens her educational and professional aspirations.

2. How Will This Micro-Project Solve the Problem?

The micro-project will provide direct financial support to cover the student's tuition and essential academic costs for the academic year. To ensure transparency and proper utilization, the funds will be paid directly to the educational institution.

By easing the financial burden:

- The student will be able to continue attending classes without interruption.
- She can participate in examinations and academic activities without concern.
- She will be able to concentrate fully on her studies instead of worrying about unpaid fees.
- The possibility of dropping out due to financial constraints will be prevented.

Additionally, our organization will monitor her academic progress and offer guidance and encouragement throughout the support period.

3. What Will This Micro-Project Change?

This support will bring significant positive changes, including:

- **Uninterrupted Education:** The student will be able to complete her B. Pharmacy program successfully.

- **Reduced Financial Stress:** Financial stability will improve her mental and emotional well-being.
- **Professional Skill Development:** She will gain the necessary knowledge and practical training in pharmacy.
- **Pathway to Employment:** Upon graduation, she will be qualified to seek employment in hospitals, pharmaceutical industries, and healthcare institutions.

Rather than remaining in a vulnerable position, she will be empowered to become self-sufficient and contribute productively to society.

4. Potential Long-Term Impact

The long-term benefits of this project are substantial:

- **Economic Empowerment:** The student will achieve financial independence and improved living standards.
- **Community Health Contribution:** As a trained pharmacist, she can serve the healthcare needs of the community.
- **Inspiration to Others:** Her success story may motivate other disadvantaged students to pursue higher education.
- **Strengthened Community Development:** Educated and employed individuals positively impact families and society at large.

By supporting this student's education, the donor agency will make a lasting investment in human potential and community advancement.

1	College fee for 1 st year	USD \$ 800
