

SUPPORT NEXT GENERATION FOREST GUARDIANS IN ECUADOR

OUR MISSION

We are a NGO based in one of the most biodiverse countries in the world, Ecuador.

Our goal is to develop conservation and ecological restoration programs in urban and rural ecosystems of Ecuador to create a sustainable future.

THE PROBLEM

Forest fragmentation and destruction from cattle ranching and monocultures persist because the essential value of forest ecosystem services is not recognized.

OUR ACTIONS

We engage local youth in environmental education to build long-term solutions that guide community action toward a sustainable landscape.

OUR GOAL FOR 2027

This fundraiser will enable us to run Eco-Club activities that promote environmental education among youth and foster lasting sustainable practices, advancing our long-term vision of a sustainable landscape.

ECOCLUBS AS A TOOL FOR CREATING CHANGE

- They cultivate local **environmental leadership** and collaboration among youth.
- Provide **environmental education** focused on forest conservation and ecosystem stewardship.
- Develop critical thinking and problem-solving skills to **help youth question current practices and propose local solutions**.
- Foster **sustainable daily habits** that can be easily adopted within their communities.
- Train youth in technology and modern tools to **prepare them for higher education and green jobs**.

YOUR SPARK, THEIR GROWTH START AT \$10, SUPPORT THE ECO-CLUB

\$10 Gives one young Forest Guardian a notebook and basic learning materials for a month

\$50 Gives one young Forest Guardian a notebook and basic learning materials for a month

\$100 Pays for an educator to lead one full day conservation workshop for the full group of 20 young Forest Guardians.

\$250 Makes one full day of wildlife monitoring possible cameras, GPS, and field tools for the whole team.
