

IGBUDU MODERN PRIMARY SCHOOL SOLAR WATER PROJECT

Providing clean, safe and reliable water for over **1,000** students, teachers and community members.

PROJECT OVERVIEW

Igbudu Modern Primary School has an existing borehole, but it depends entirely on an unreliable electricity supply to function. Frequent power outages leave the school and surrounding community without access to clean water. Our Solar Water Project will upgrade the existing system with a solar-powered pump, storage tank, and improved water distribution — ensuring clean, safe water all year round.

BENEFICIARIES
1,000+
Students, Teachers & Community Members

CLEAN WATER
24/7
Reliable Access, Every Day

BETTER HEALTH & HYGIENE
Reduced Waterborne Diseases

BETTER LEARNING ENVIRONMENT
More Time in Class, More Opportunities

THE PROBLEM

- The existing borehole relies on unreliable electricity.
- Frequent power outages cause water shortages.
- Students leave class to fetch water from distant wells.
- Poor water access leads to poor hygiene and waterborne diseases.

OUR SOLUTION

- Install a solar-powered water pumping system.
- Provide a high-capacity water storage tank on a raised stand.
- Ensure clean, safe, and reliable water 24/7.
- Improve access for the school and surrounding community.

EXPECTED IMPACT

- Sustainable access to clean water year-round.
- Improved health and hygiene.
- Increased school attendance and better learning outcomes.
- Stronger, healthier community for years to come.
