“Safe and Efficient Hospital Laundry”

Hospital

March 2026

Antigua Guatemala, March 2026

Dear:

Hermano Pedro Foundation USA

Receive a fraternal and respectful greeting on behalf of the Obras Sociales del Santo Hermano Pedro Association, Franciscan Friars OFM, with the sincere wish that God bless and accompany you always in your valuable work.

For the past 44 years, Obras Sociales del Santo Hermano Pedro has fulfilled its mission of transforming lives by providing comprehensive care to the poorest and most vulnerable people in our country. Through our Homes and Health programs, we serve with love, charity, and human dignity across all our facilities: Hospital Obras Sociales del Santo Hermano Pedro, Virgen del Socorro Home, Nutritional Recovery Center, Renacer Home, Sacred Heart of Jesus Childcare Center, and Santo Hermano Pedro Shelter.

On this occasion, we respectfully present for your consideration the project "Safe and Efficient Hospital Laundry," which is essential for strengthening the operational capacity of our hospital, as it is a daily-use and vital area for ensuring proper care and hygiene for our surgical patients, staff, and medical teams.

The implementation of this project will improve infrastructure safety conditions, efficiency, and hygiene within the laundry area, enhancing overall operations while providing a dignified and safe working environment for our personnel, who dedicate their effort and compassion to serving patients through their valuable work.

As a nonprofit institution, we rely greatly on the generous support of partners and benefactors to continue providing dignified and timely care to those who need it most. Therefore, we respectfully request your valuable support to make this project a reality, as it will have a direct impact on the quality of service that the Hospital has always strived to provide to the most vulnerable members of our country.

Grateful for the support you have always extended to us, we take this opportunity to express our appreciation and pray that God abundantly bless your generosity and commitment to serving others.

Fraternally yours,

Fray Jesús Humberto Gómez Sánchez, OFM
Director General

Obras Sociales del Santo Hermano Pedro

Our Commitment to Those Most in Need

Obras Sociales del Santo Hermano Pedro Association (AOSSHP), located in the Colonial City of Antigua Guatemala, Sacatepéquez, Guatemala, has spent more than four decades bringing hope and health to those most in need. Throughout these 44 years of uninterrupted service, we have provided medical care and comprehensive support to more than 2.5 million people, many of whom live in conditions of extreme poverty and without access to basic healthcare services.

Obras Sociales is the result of many hearts wonderfully inspired by God to cooperate in the development of an assistance system dedicated to serving the poorest people of Guatemala.

Our mission is clear: to transform lives by living out the Gospel, serving the poorest and most vulnerable people of Guatemala without distinction, and providing the highest quality healthcare in the spirit and example of Santo Hermano Pedro.

A thick, curved orange line starts from the top right corner, curves downwards and to the left, and then curves back towards the bottom right corner, framing the text on the page.

With a humanitarian approach, our Homes and Health programs provide comprehensive care to people with disabilities, abandoned older adults, children suffering from severe malnutrition, youth undergoing rehabilitation processes, and patients without access to specialized medical treatments. This support is delivered through five residential homes that currently shelter a total of 475 residents: Virgen del Socorro Home, Hermano Pedro Shelter, Nutritional Recovery Center, Childcare Center, and Renacer Rehabilitation Center.

Through our Health Program, and specifically the Hospital Obras Sociales del Santo Hermano Pedro, we provide daily care to approximately 500 patients from different regions of the country, many of whom travel long distances with the hope of finding relief, diagnosis, and timely treatment. In 2025, together with 57 volunteer medical groups from different parts of the world, we successfully performed a total of 5,100 surgeries across various specialties in our eight operating rooms, restoring health and dignity to thousands of Guatemalans seeking hope and better access to healthcare.

In this way, each department of Obras Sociales del Santo Hermano Pedro works for the benefit of every resident and patient who places their trust in our mission, providing services with both quality and compassion in pursuit of improving their living conditions.

The Reality We Face

In Guatemala, a large portion of the population lives in conditions of multidimensional poverty, where more than half of the country's population faces deprivation across key indicators such as health, food security, education, employment, and housing. Most of this population resides in rural areas, where access to basic public services remains insufficient and difficult to obtain.

In this context, Guatemala faces a structural public health crisis in which millions of people lack adequate access to medical services. More than 50% of the population experiences multidimensional poverty, and the public healthcare system, unfortunately, is unable to meet even basic needs. As a result, healthcare services often fail to reach the most remote regions of the country. Although private medical centers exist, the vast majority of the population does not have the financial resources required to access medical care or treatment. Consequently, preventable or treatable diseases progress more easily and rapidly when they are not addressed in a timely, appropriate, and quality manner.

Against this backdrop, the Hospital Obras Sociales del Santo Hermano Pedro has become a place of health and hope, where solidarity and medical volunteerism make possible what once seemed unattainable for many.

Why We Need Your Support

In Guatemala, we face a serious public health challenge in which the most vulnerable populations do not have fair and adequate access to healthcare services. For this reason, the Hospital Obras Sociales del Santo Hermano Pedro seeks to provide access to healthcare for Guatemalan men and women with limited financial resources who require medical attention across different specialties, with the goal of improving their quality of life.

The demand for surgical interventions at the OSSHP Hospital is considerably high. Therefore, in order to continue providing safe and high-quality medical care, it is necessary to strengthen operational areas such as the hospital laundry, which plays a critical role in supplying hospital linens essential for maintaining hygiene and sterility throughout the hospital's surgical program.

Currently, part of the equipment is in poor condition due to its age and continuous use. Likewise, the facilities in this area are not adequately suited to meet the workload and operational results required, given the weekly demand from all medical departments of the hospital. This space requires significant improvement, particularly with regard to the safety and well-being of the personnel responsible for this area, as it is currently poorly distributed and operates under unfavorable conditions.

In this context, it is important to highlight that, on average, 80,100 pounds of hospital laundry are washed and dried each month, depending on the weekly surgical workload. Additionally, a total of 24,600 garments are ironed using traditional methods, a slow and highly time-demanding process that, depending on the volume of laundry, can lead to accumulation and saturation within the ironing area.

Given the high demand for washing, drying, and ironing services, it is necessary to acquire new equipment, considering that the current machinery is no longer in optimal condition. As a result, frequent breakdowns and maintenance needs cause hospital linens to accumulate, generating delays in deliveries to different hospital departments. Currently, the laundry service manages to meet an average of 85% of daily demand, depending on fluctuations in service volume associated with medical and surgical schedules.

General Objective

- To strengthen hygiene conditions, biosafety, and operational efficiency at the Hospital Obras Sociales del Santo Hermano Pedro through the renovation of infrastructure and the acquisition of modern equipment for the hospital laundry, ensuring the proper processing of hospital linens and contributing to the prevention of healthcare-associated infections.

Specific Objectives

- 1.To modernize hospital laundry equipment through the acquisition of efficient industrial machinery that optimizes the washing, disinfection, drying, and ironing processes of hospital linens.
- 2.To improve biosafety conditions by adapting clean and contaminated areas, reducing risks of cross-contamination and strengthening sanitary control protocols.
- 3.To increase the operational capacity of the laundry service, ensuring the timely supply of clean linens for the hospital's various clinical and surgical areas.
- 4.To improve working conditions for personnel responsible for the laundry area.
- 5.To strengthen the continuity of hospital services through a functional laundry system capable of responding to the growing demand for medical care.

Project Description

The project “Safe and Efficient Hospital Laundry” aims to ensure efficient, high-quality operations through the acquisition of new laundry equipment, which will improve effectiveness and enhance the overall performance of the area. Additionally, this project seeks to improve infrastructure conditions, which are currently inadequate both for the proper handling of hospital linens and for the safety, well-being, and comfort of the personnel working in this area.

Accordingly, the project includes the following components:

- Purchase of two (2) Milnor 100 lb washing machines
- Purchase of one (1) Speed Queen 170 lb dryer
- Purchase of one (1) Renzacci flatwork ironer
- Renovation and refurbishment of the operational area
- Installation of the acquired equipment

Overall, the implementation of this project will strengthen the infrastructure of our laundry facility and provide high-quality, higher-capacity operational equipment. This will help ensure the quality of hospital services while also creating safer, more suitable working environments for the personnel assigned to this area.

In this way, the project aligns with the institutional mission of providing dignified, safe, and high-quality medical care to the people of Guatemala who need it most.

Implementation Schedule

Implementation Schedule									
No	Activity	Week							
		1	2	3	4	5	6	7	8
1	Purchase of washing, drying, and ironing equipment								
2	Removal of obsolete equipment (washing and drying units)								
3	Foundation work for new equipment bases (anchoring bolts installation)								
4	Infrastructure improvements in the laundry area (refurbishment, painting, and flooring replacement)								
5	Electrical reengineering of the laundry service connection								
6	Removal of existing windows								
7	Installation of new washing, drying, and ironing machinery								
8	Installation of a new gas service connection								
9	Supply and installation of dryer ductwork								
10	Installation of new windows								
11	Maintenance of existing equipment								

Note: **Schedule subject to change**

Expected Impact

The implementation of the project in the laundry area will significantly improve hygiene conditions, operational efficiency, and safety in the handling of hospital linens. By having adequate and functional equipment, proper washing, disinfection, drying, and ironing processes will be ensured in accordance with appropriate sanitary standards, thereby reducing the risk of healthcare-associated infections.

Likewise, strengthening the operational capacity of the laundry service will help optimize hospital linen processing times, ensuring the timely availability of sheets, gowns, towels, and other textile supplies required for the daily care of patients. Furthermore, the execution of this project will improve working conditions for personnel responsible for the laundry area and contribute to the efficient functioning of the hospital's various services in the medium and long term, reinforcing the hospital's operational sustainability.

Expected Results

Objective	Results
General Objective	R1: Hospital laundry renovated and equipped with appropriate machinery that enables the efficient and safe processing of hospital linens. R2: Optimization of the laundry area's operational workflow, reducing processing times and improving service efficiency. R3: Improved working conditions for personnel responsible for the laundry area through the use of modern and functional equipment.
Specific Objective 1	R1: Industrial washing machines, dryers, and flatwork ironer installed and fully operational. R2: A 15% increase in the daily processing capacity of hospital linens. R3: Reduction in washing, drying, and ironing times for linens used across the hospital's different departments.
Specific Objective 2	R1: Reduction of the risk of cross-contamination in the handling of hospital linens. R2: Improved control over the proper separation of clean and contaminated linens within the laundry area.

Specific Objective 3	R1: Timely availability of clean linens for the hospital's different services. R2: Improved organization and workflow within the laundry area. R3: Reduction in delays in the delivery of clean linens to the hospital's various departments.
Specific Objective 4	R1: Equipment that reduces physical strain on personnel and improves workplace safety. R2: More organized and functional workspaces within the laundry area. R3: Increased efficiency and motivation among personnel responsible for the area.
Specific Objective 5	R1: Increased hospital linen processing capacity in line with the growth in patient care demand. R2: Greater hospital capacity in the medium and long term to respond to increasing healthcare demand without compromising service quality.

Technical Aspects

- **Project location**

Hospital de las Obras Sociales del Santo Hermano Pedro
6ª. Calle Oriente No. 20, Antigua Guatemala, Sacatepéquez, Guatemala

- **Intervention area**

Operational services

- **Beneficiaries**

Direct Beneficiaries:

- Staff in charge of laundry operations.
- Patients treated in the different medical areas of the hospital.

Indirect Beneficiaries:

- Staff from the clinics and medical areas of the hospital who have access to hospital clothing to provide medical services.

- **Those in charge of the execution of the project**

- Maintenance department
- Sustainability department

TIEMPO DE ENTREGA: **06-08** semanas ex-fábrica a confirmar por el proveedor, más **05-06** semanas de fletes y trámites aduanales, contadas a partir recibir el anticipo.*

**El tiempo de entrega descrito sirve únicamente como una indicación aproximada. Actualmente los fabricantes de los equipos están afectados significativamente por los mercados volátiles de materias primas y componentes fabricados por terceros. Derivado de esto no pueden ofrecer una fecha de entrega fija ni aceptar órdenes con penalizaciones, por lo que el tiempo de entrega está sujeto a cambios. Tomar esto en cuenta para su planificación.*

NOTAS:

- **El equipo se entrega montado sobre el transporte.** La descarga, colocación en su lugar final e instalación podrá ser cotizado por el Departamento de Servicios a solicitud del cliente.
- El emitir una orden de compra con base en esta cotización, implica la completa aceptación de las cantidades, precios, especificaciones técnicas de los equipos y sus componentes, tiempo de entrega, forma de pago y condiciones generales descritas en la misma, las cuales no pueden ser cambiadas posteriormente a su aceptación y aprobación.
- La posterior cancelación de la orden de compra emitida está sujeta a un cobro o a la pérdida del anticipo recibido de acuerdo a la política del proveedor de los equipos.

Para cubrir la garantía del equipo, SIDASA realizará el arranque del mismo y las instrucciones básicas de operación del equipo, sin costo adicional, siempre y cuando:

- La instalación del equipo, en caso no haya sido efectuada por SIDASA, deberá ejecutarse de acuerdo a los requisitos de fábrica, especificaciones y normas de ley. De no ser así, SIDASA reportará las correcciones que deberán hacerse previo al arranque.
- El tiempo estimado para el arranque es un día hábil. De realizar algún trabajo adicional o existiera demora por causas ajenas a SIDASA, serán cobrados por separado aplicando la tarifa vigente.

En espera de atenderle muy pronto, nos suscribimos.
