Clarion Times Foundation

SAVE KENYAN FAMILIES FROM DEADLY EBOLA OUTBREAK

Protecting families. Supporting local responders.
Helping communities prepare and stay informed.

PROJECT BUDGET $100,000

PROPOSED RESPONSE | KENYA | 14 OCTOBER 2026

PROJECT OVERVIEW

A family-centred response

A confirmed Ebola infection can turn an ordinary family day into days of waiting, fear and difficult decisions. Clarion Times Foundation proposes practical support for Kenyan households, community health volunteers and local organisations as health authorities manage the current cases.

OUR PURPOSE

Support trusted health information, household hygiene, assistance for families under quarantine, and safe referral to authorised health services. The proposed programme will operate with local partners and under the direction of Kenyan public health authorities.

Funding sought

$100,000

Status

Proposed project

Planning stage

VERIFIED SITUATION: 14 OCTOBER 2026

The public health situation

2
confirmed cases

1
reported death

128
identified contacts

Kenya confirmed a second Ebola case on 14 October. The second patient was already in quarantine and the two cases are linked. Authorities reported no evidence of wider community transmission. Of 128 contacts identified, 108 were in quarantine in Kenya.

The wider regional outbreak in the Democratic Republic of the Congo adds urgency to preparedness. Kenya already has designated isolation and treatment facilities. This proposal is intended to complement, not duplicate, the national response.

THE HUMAN IMPACT

What families need

Clear, calm guidance

Families need reliable answers about symptoms, exposure and when to call health services.

Everyday essentials

Households under quarantine may need food, safe water and help accessing basic supplies.

Dignified care

People with possible exposure need respectful support and referral through approved health channels.

Our response will avoid fear-based messaging, protect confidentiality and place community trust at the centre of every activity.

FIVE LINKED ACTIVITIES

Our response plan

01 Door-to-door health education

Volunteers will share approved information, listen to concerns and explain where families can seek care.

02 Contact tracing support

Under health authority supervision, trained teams will help identify exposed contacts, conduct confidential follow-up and report symptoms promptly.

03 Household hygiene support

Distribute practical hygiene kits and establish handwashing points in agreed community locations.

04 Family assistance and referrals

Provide food parcels for eligible quarantined households and arrange transport through authorised ambulance services.

05 Local grants and isolation readiness

Support eligible Kenyan groups and plan temporary isolation capacity in coordination with health authorities.

PROPOSED REACH

Targets and delivery

50,000

people receiving health education

10,000

households receiving hygiene kits

20

community handwashing points

50

community volunteers trained

These are proposed programme targets, not services already delivered. Baseline mapping, procurement quotes, staffing and local authority requirements will determine the final workplan.

RESPONSIBLE DELIVERY

Implementation and safety

Month 1

Partner assessment, authority consultations, community mapping, supplier quotes and volunteer preparation.

Months 2–3

Household education, hygiene distribution, local grants, support for quarantined families and referrals.

Months 4–6

Follow-up visits, volunteer mentoring, handwashing point maintenance, expenditure checks and final reporting.

Safeguards

No independent clinical treatment or unapproved isolation operations. Suspected cases will be referred to designated services. Staff will follow official infection prevention guidance, consent and safeguarding procedures.

USD 100,000

Detailed project budget

BUDGET LINE	USD
Community visits and education	18,000
Hygiene kits for 10,000 households	17,000
20 handwashing points	9,000
Volunteer training and contact tracing	8,000
Quarantine family food and essentials	12,000
Small grants to local organisations	16,000
Approved isolation readiness / referral support	12,000
Monitoring, administration and audit	8,000
TOTAL PROJECT BUDGET	**100,000**

Budget is indicative and will be adjusted after local quotations and approvals. The isolation allocation covers assessment, readiness and referral support; construction or operation requires explicit authorisation.

HOW FUNDS WILL BE MANAGED

Accountability and partners

Local leadership

Clarion Times Foundation will identify and assess Kenyan implementing organisations before issuing any small grants.

Grant controls

Partner agreements will set permitted expenses, safeguarding rules, reporting dates and documentation requirements.

Transparent procurement

Purchases will be supported by quotations, receipts, inventory records and delivery confirmations.

Community feedback

Volunteers will provide accessible channels for complaints, concerns and referrals without collecting unnecessary medical details.

No formal partnership with the Kenyan Ministry of Health, WHO or any named local organisation is claimed in this proposal. Agreements and permissions will be obtained before field implementation.

FUNDING INVITATION

Stand with Kenyan families

$100,000 RESPONSE FUND

Your support can help local teams share reliable information, deliver basic household supplies, assist families facing quarantine and support safer referrals.
