

FUNDRAISING PROJECT | WINTER 2026–2027

A Roof Above Every Rescue

Protecting 190 outdoor kennels through the rainy season, winter snowfall and summer heat

190	3,040 m²	€76,000
KENNELS TO PROTECT	INDICATIVE COVERAGE	FUNDRAISING GOAL

When rescue becomes a promise of safety

A rescued dog may arrive at Ringo Land after months on the street, a difficult stay in a public shelter or a life marked by neglect. Recovery begins with the essentials: safety, daily care, patience and a place where the dog can finally rest. For many of our residents, an outdoor kennel is not simply a temporary space. It is where trust is rebuilt, where wounds heal and where a second chance begins.

As autumn gives way to the Romanian winter, that promise is tested. Cold rain, sleet and snow can reach uncovered kennel areas, leaving dogs and caretakers to contend with persistent dampness and freezing conditions. And when summer returns, exposed surfaces absorb the sun's heat, making shade and effective thermal protection just as important.

Our goal is simple: provide durable, insulated roofs for 190 outdoor kennels, protecting the dogs in our care through every season.

About No Limit Pets

Founded in 2018, Asociația No Limit Pets is a Romanian animal welfare organisation operating two private shelters in Bacău County: Ringo Land in Prăjești and Sanctuary Ringo Land in Galbeni. Together, they care for approximately 850 rescued dogs. Our more than 30 staff members, alongside volunteers, provide veterinary care, daily shelter management, behavioural rehabilitation, adoption support and educational outreach.

Some dogs stay with us only until they are ready for a family. Others need months of rehabilitation, and some may spend the rest of their lives in our care. All of them deserve living conditions that protect their health and dignity.

Why these roofs matter now

- Rain and snow protection: roofed outdoor runs help reduce direct exposure to precipitation, standing water and wet resting surfaces.
- Less seasonal stress: improved cover makes daily care and rehabilitation more reliable during cold, muddy and changeable weather.
- Summer protection: insulated roofing and shade reduce direct solar exposure and help limit heat transfer into the kennel area.
- Long-term welfare: strong, weather-resistant roofs are a lasting improvement rather than a temporary winter repair.

The proposed solution

We will install insulated sandwich roofing panels on welded steel frames. Each panel has a foam core that slows heat transfer, unlike a bare metal roof. In winter, the covered kennels are better protected from rain and snow; in summer, the insulation and shade reduce solar heat gain. Roofs will be fitted with proper drainage and airflow.

SMALL KENNEL ROOF Approx. $1.5 \times 3 \text{ m}$ · indicative cost €200

LARGE KENNEL ROOF Approx. $6 \times 6 \text{ m}$ · indicative cost €600

Budgeting basis: an indicative average of 16 m^2 per kennel, at €400 per roof including materials and skilled installation labour.

Transparent budget: one representative kennel

ITEM	QUANTITY / UNIT COST	RON	EUR
Insulated sandwich roofing panel	$16 \text{ m}^2 \times \text{RON } 70/\text{m}^2$	1,120	€209.35
Square steel tubing / roof supports	Approx. 24 linear m $\times$ RON 24/m	576	€107.66
Welding, adhesives and accessories	Indicative lump sum	200	€37.38
Direct materials subtotal		1,896	€354.39
Skilled labour and roof installation	Steel fabrication, welding and fitting ≈ 244		€45.61
BLENDED ROOF BUDGET	Average planning estimate	$\approx 2,140$	€400.00

Indicative conversion: €1 $\approx$ RON 5.35 (27 October 2026). Labour for fabrication and installation is included in the €400 average. Material quantities and prices will be confirmed through measurements and supplier quotations.

190 roofs $\times$ €400	$190 \times 16 \text{ m}^2$
€76,000 total fundraising target	Approx. 3,040 m^2 of insulated coverage

Delivery and accountability

Kennels will be assessed and prioritised by weather exposure and the vulnerability of their residents. Our team will procure materials, fabricate steel frames and install roofs in stages as funding arrives. Progress and spending will be documented through invoices, work records and before-and-after photographs.

Help us put lasting protection over 190 kennels. €200 can fund a small roof; €600 can fund a large one. Every contribution protects rescued dogs from rain, snow and summer heat.
