WHAT WE DO

PAINTING EXCELLENCE is our main program, aim to provide learning spaces for at least 240 boys, girls, and youth who are the beneficiaries, within these spaces they are able to grow and develop intellectual skills in a holistic way, become structured individuals, have access to work and be involve actively and positively in society.

In order to achieve this, we have the help of a multidisciplinary team of volunteers and paid staff, all working under the following premise: Love is the engine that drives our work.

WHY

The Colombian population is experiencing a social and moral crisis comprised of longstanding social problems, such as unemployment, malnutrition, high levels of violence, students dropping out of school, early pregnancy, drug addiction in youth, high personnel turnover in companies, corruption, and indifference regarding the high rates of extreme poverty and destitution, as well other problems.

It is our perspective that these problems originate from a lack in human formation - intellectually, socially, and at the level of family - therefore our work focuses on ensuring the full development of children and youth in a holistic manner, with the goal that they multiply in their communities, in their productive lives, and in the country.
