

MOBILITY INDIA

About Mobility India

Mobility India (MI) founded in Bangalore in 1994, addresses issues of people with disabilities, specially the economically weaker section of society with priority to Women and Children. The activities focus on rights to health care including rehabilitation services, education, livelihood, social inclusion & participation, training and research & development.

Mobility India's Rehabilitation Research and Training Centre in Bangalore, a model of disability friendliness, houses all its activities. Regional Resource Centre in Kolkata was established in 1998. The organisation has a perfect blend of disability and non-disability at all levels - an innovative organisation of abilities and commitment in its approach to address the real need.

Community Based Rehabilitation in Urban, Peri-Urban & Rural Districts

Enhance the quality of life of persons with disabilities and their families.

The activities facilitate access to basic needs such as livelihood, healthcare, education, housing etc., by building multi-sectoral linkages for a community based and inclusive development.

*Appropriate rehabilitation
service at doorstep*

Programme Areas:

Urban Slums in Bangalore- Covers 23 slums in Banashankari, LR Nagar, Avalahalli and GG Halli. An inclusive approach in general community development addressing basic rights to education, primary health care, rehabilitation, livelihood, social and empowerment.

Peri-Urban Programme in Anekal Taluk, Bangalore- in 44 villages of Attibele Hobli, the key activities are-

- ◆ Children with disabilities would access primary education.
- ◆ To enhance economic and socio-political status of people with disabilities and to increase their participation as equal members of society.

Rural Education & Livelihood Opportunities Programme, in Chamrajnagar District of Karnataka in 2 hoblies (76 villages).

Using a holistic approach, the programme simultaneously tackles 3 inter-connected elements

- ◆ Inclusive Education
- ◆ Livelihood Opportunities
- ◆ Rehabilitation Services

Inclusive Education

Development and Promotion of Appropriate Technology:

Design and Develop Orthoses, Prostheses and its components that are cost effective, light weight, durable based on the need of a large number of people with disabilities specially poor, to be fitted in the quickest possible time.
