Professional**

Deepak Sharma

**Corporate Professional,
Philanthropist & Author**

A close-up photograph of a metal surface. On the left, there is a perforated metal plate with a grid of small circular holes. To the right, a metal beam is painted yellow and has the words "CAUTION" and "DANGER" written in large, bold, yellow letters. The text is oriented vertically along the length of the beam. A white horizontal line runs across the middle of the yellow-painted section. The background is a dark, possibly black, surface.

THE PROBLEM STATEMENT

SKILL GAP IS THE SINGLE BIGGEST CONTRIBUTORY FACTOR FOR UNEMPLOYMENT

India needs to create at least 90 million new non-farm jobs by 2030 to absorb new workers*.

Lack of Employable Skills

Schools even today are training students from a young age in skills that have no use in the market in the future. **Students need future-ready 21st-century skills.**

Rapidly Changing Market Demands

There is a **high turnover of new skills in the technology based sectors**. Students have to prepare for jobs that do not exist when they are studying.

Low GER amongst 18-23 YO

India currently has a Gross Enrollment Ratio (GER) of 26.6%. That means, 74% of the 18-23 age group are **not getting access to higher education or simply cannot afford it.**

A Large Pool of Supply

13MN youth join the job market every year in India. This has led to an abundance of supply and kept the wages low. At the same time, only 2% of the workforce is formally skilled

Lack of Industry Participation in Skilling

Till date, Industry participation in skilling youth has been sketchy and insufficient. However, today, many corporates are actively involved.

Availability of 'Decent Work'

As a society, **Indians value white collar jobs over vocational skills**. This has led to high competition for 'Decent Job' options.

A hand is holding a wooden-framed chalkboard against a light blue background. The word "POSSIBLE" is written in white chalk on the black surface of the board. Three pieces of chalk in different colors (grey, purple, and orange) are lying on the board to the right of the word. The hand is positioned on the left side of the board, with fingers spread across the top edge.

PERFORMANCE: Achieved 70%+ placements in Job Specific Courses for FY 2022-23

Vandana Prajapati was born in a small village in Jhansi District, UP. Her father supported a family of four with modest earnings from a tea stall

UDAYAN CARE IT CENTRE

Her life took a U-turn when she joined Udayan Care's IT Center for pursuing a course in Graphic Designing. Even though she joined mid-way, Vandana worked hard to become one of the best in her class.

Sky's the limit for Vandana today. She has now moved to Dubai with Melorra Gold & Diamonds, from where she handles the Bangalore operations.

Her family paid for a course in Commercial Arts in Delhi, but unfortunately, she had to drop out mid-way due to financial constraints. This was a big setback for her.

After a short stint in Delhi with an upcoming T-Shirt manufacturer, she got her big break with the renowned brand, 'Melorra Gold & Diamonds Pvt Ltd', as a Graphics Designer in Bangalore

Yogesh grew up in a poor family with his parents & 4 siblings

Today, Yogesh is proudly working as the Front Desk Executive(Billing) at Café Coffee Day

He was passionate about computers since the time he was in school

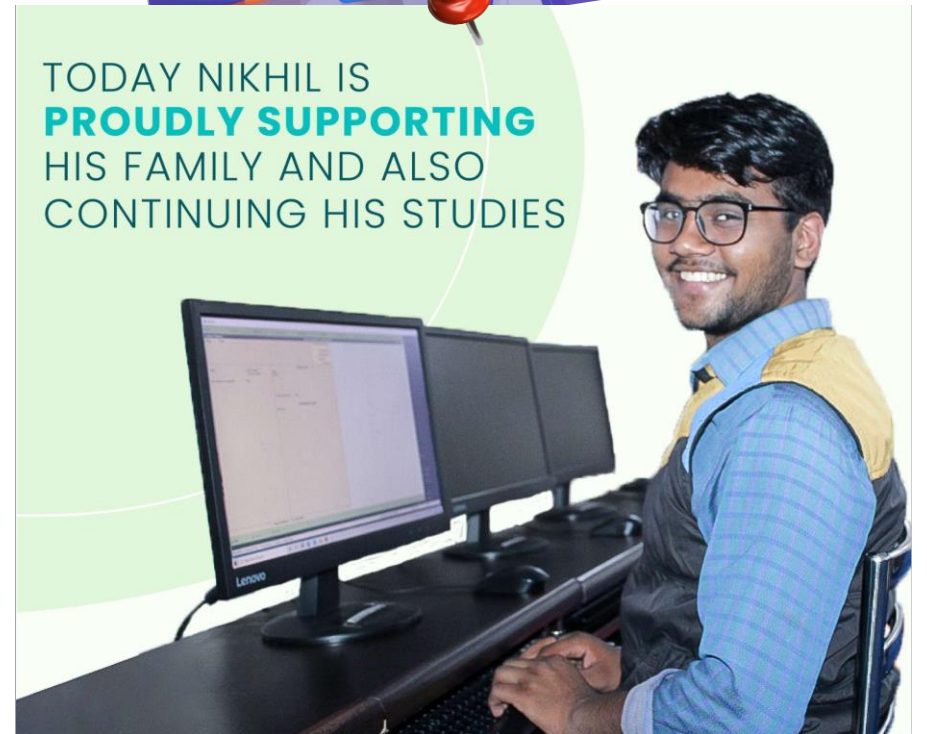

He got placed at Café Coffee Day through the 1st Campus Placement Drive organized by Udayan Care IT Program

After graduation, he joined Udayan Care IT Centre to pursue Diploma in Information Technology (DIT)

Anjali and her younger brother were raised on the meager income of their family

A friend of hers connected her with our Nangloi IT Centre, where she enrolled in the Diploma in Information Technology (DIT) program

Her dedication led her to a full-time job as a "Customer Relationship Manager" at IGBSS Uttam Nagar

She had to work part-time at a school after completing her 12th grade to assist her mother

SOME PROGRAM GLIMPSES
