Peer-to-Peer Discussion

How does disaster
grantmaking fit into your
overall grantmaking and
CSR strategies?

Grantmaking Strategy Considerations

A photograph of a woman with dark hair, smiling, holding a baby in a blue and white checkered shirt. A young boy with dark hair, wearing a grey vest over a red long-sleeved shirt, is leaning against her. They are in a tent-like setting with a blue tarp in the background. Another person is visible in the background, sitting on the ground. The overall scene suggests a refugee or displaced person camp.

Engaging Local Teams

Community

Local organizations know their communities and will be there for the long haul.

Trust-based

Communities need flexible capital for immediate relief through long-term recovery.

Resilience

Strengthen civil society in disaster-affected areas.

“It’s up to the community to figure out the solutions that will work for their community.”

SARA BROWN

Coalition for the Homeless of Houston/Harris County

Opportunities for Innovation

Moved by widely publicized human suffering and increased disaster aid requests, foundations and **corporations are becoming more active in the disaster relief field.**

Grantmakers have a distinct role to play in disasters because of their ongoing relations with grantees, long-term perspective, flexibility and convening capacity.
